DATA ITEM DESCRIPTION

Title: MANUFACTURING SAFETY CHECKLIST

Number: DI-SAFT-82280

Approved Date: 20190801

AMSC Number: F10059

Limitation: N/A

DTIC Applicable: No

GIDEP Applicable: No

Preparing Activity: 170 (AFLCMC/WWM)

Project Number: SAFT-2017-005

Applicable Forms: N/A

Use/Relationship: The Manufacturing Safety Checklist provides the identification of manufacturing problems that impact the safety of personnel, disable equipment, and degrade the usefulness of facilities.

a. This Data Item Description (DID) is applicable when a contractor is involved in the manufacture, test, or use of hazardous items or materials.

b. This DID contains the format, content, and intended use information for the data product resulting from the work task described in the contract statement of work (SOW).

Requirements:

1. Reference documents. None.

2. Format. The Manufacturing Safety Checklist shall be in the contractor's format and shall be titled "Manufacturing Safety Checklist for contract #_____."

3. Content. The Manufacturing Safety Checklist shall include the following:

3.1. Process Title.

3.2. Identification of any solvents, coolants, or materials used in processing items that are toxic, flammable, radioactive, or otherwise hazardous to personnel or facilities.

3.3. Analysis of the development and interim processing of the composition, components, or end items. The analysis shall identify whether any of the following events occurred during the development and interim processing of the composition, components, or end items:

a. Any safety and health incidents or accidents experienced during any portion of the processing; loading, assembling, packing of the components or end items; or during testing.

1) If so, describe the event(s). Describe root cause(s) and corrective action(s) taken. Indicate if corrective action(s) are noted in the Technical Data Package (TDP), Standard Operating Procedure (SOP), or process specifications.

Check the source to verify that this is the current version before use.

b. Any energetic reactions experienced (e.g., explosion, deflagration, fire, smoke) during any portion of the processing; loading, assembling, packing of the components or end items; or during testing.

1) If so, describe the event(s). Describe root cause(s) and corrective action(s) taken. Indicate if corrective action(s) are noted in the TDP, SOP, or process specifications. Identify equipment failures having an impact on the safety of the process and describe corrective action(s) taken. Identify any other potential safety critical areas of operation associated with the manufacturing of the item and describe action(s) taken to reduce the risk.

c. Include any recommendations that can improve the safety of development and interim processing operations.

End of DI-SAFT-82280
