DATA ITEM DESCRIPTION
Title: POD STRUCTURAL DESIGN CRITERIA REPORT

Number: DI-SESS-82265
AMSC Number: N10030
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20190516
Limitation: None
GIDEP Applicable: No
Project Number: SESS-2019-018

Use/relationship: The Pod Structural Design Criteria Report describes the complete set of criteria used to design a pod structure. The data will be used to verify that the pod structure will meet all operational and maintenance requirements defined in the contract.

a. This Data Item Description (DID) contains the format and content for data resulting from the work tasks described by the contract statement of work.

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

   (Copies of the Joint Service Specification Guide (JSSG)-2006 (Aircraft Structures) are available online at https://assist.dla.mil/)

2. Format. Contractor format acceptable.

3. Content. The Pod Structural Design Criteria report shall contain the following:

3.1 Describe the relevant and tailored structural design criteria from the JSSG-2006 that are to be used to design the pod structure.

3.2 Describe any additional relevant and tailored structural design criteria that are to be used to design the pod structure.

3.3 Describe any proposed structural design criteria that differs from common and accepted aerospace industry design criteria for Naval Tactical Aircraft structural design.

3.4 Describe the verification methodology to be used in conjunction with the structural design criteria to show that the pod structure will meet the requirements in the contract.
