DATA ITEM DESCRIPTION
Title: ELECTRIC LOAD AND POWER SOURCE CAPACITY REPORT

Number: DI-SESS-82282
AMSC Number: N10064
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20190807
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2019-031

Use/Relationship: The electric load and power source capacity analyses report shall consider all aircraft or equipment operating conditions in order to ascertain or maintain robustness of each electric power system in the aircraft or equipment. This Data Item Description (DID) may be applied to analyses requirements of special-purpose electric systems (e.g. electrical systems in backup mode, independent engine ignition and control generator systems, general-purpose electric systems, etc.).

This DID contains the format, content, and intended use information for the data product resulting from the work task described by the contract statement of work (SOW).

Requirements:

1. Reference Documents: The applicable issue of the documents cited herein, including their approval dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format: The report format shall be prepared in accordance with latest version of detail specification, Electric Load and Power Source Capacity, Aircraft, Analysis of, MIL-E-7016, section 3.3, 3.4, and its subsections.

3. Content: The report content shall be prepared in accordance with latest version of detail specification, Electric Load and Power Source Capacity, Aircraft, Analysis of, MIL-E-7016, section 3.5 and its subsections.

End of DI-SESS-82282
