DATA ITEM DESCRIPTION
Title: Missile Defense Agency (MDA) Systems Engineering Technical Review (SETR) Package

Number: DI-SESS-82305
AMSC Number: 10123
DTIC Applicable: No
Preparing Activity: MDA
Applicable Forms: No

Approval Date: 20191114
Limitation: N/A
GIDEP Applicable: No
Project Number: SESS-2019-068

Use/Relationship: The Systems Engineering Technical Review (SETR) Package is used by the Government to determine if the emerging system has demonstrated sufficient maturity to enter the next phase of development.

This Data Item Description (DID) contains the format, content, and intended use information data deliverable resulting from the work task described in the contract. This DID is applicable to all Department of Defense (DoD) acquisition programs through all program lifecycle phases.

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

    1.1. MDA Instruction 5000.20-INS, "Engineering Technical Review Process," available as a Government Furnished Information (GFI). This Missile Defense Agency (MDA) Instruction provides detailed processes as it applies to Engineering Technical Reviews. This instruction is available via request to MDA/DS, 5700 18th Street, Building 245, Fort Belvoir, VA 22060-5573

2. Format.

    2.1. The deliverable shall be in the format prescribed in the contract and in accordance with MDA Instruction 5000.20-INS.

    2.2. Enclosure 6 – Objective Evidence Matrix Template IAW MDA Instruction 5000.20-INS, shall dictate objective Evidence format.

    2.3. Delivery format can also be in the form of a digital model(s) or as a part of a larger digital model that also encompasses other systems. When delivered as a digital system model the format shall be in the native model and/or standard-defined data format(s) as specified in the contract statement of work.

3. Content. The SETR Package that is required in the contract's SOW tasking and delivered per the CDRL shall contain the data that supports the entrance and exit criteria IAW MDA Instruction 5000.20-INS:

3.1. The SETR Package that is required for delivery prior to the System Requirements Review (SRR) shall contain content that supports the SRR entrance and exit criteria.

3.2. The SETR Package that is required for delivery prior to the System Preliminary Design Review (PDR) shall contain content that supports the PDR entrance and exit criteria.

3.3. The SETR Package that is required for delivery prior to the System Critical Design Review (CDR) shall contain content that supports the CDR entrance and exit criteria.

3.4. The SETR Package that is required for delivery prior to the System Final Design Review (FDR) shall contain content that addresses the health of the system design in response to the deficiencies noted in the System CDR.

3.5. The SETR Package required for delivery prior to any Technical Review shall contain content that addresses the health of the system, entry and exit criteria for that technical review, results of previous technical activities since the last technical review (e.g., studies, analyses), product updates, and other pertinent information.

END OF DI-SESS-82305
