COMMERCIAL ITEM DESCRIPTION

RUBBER STAMP, FIXED LEGEND

The General Services Administration has authorized this commercial item description for use in lieu of Federal Specification ZZ-R-804.

Salient characteristics:

Each stamp shall consist of a die with type, mounted on a block, together with a handle securely attached to the block, perpendicular to the face of the die.
Synthetic and/or natural rubbers used in the stamp shall be of sufficient hardness and durability to ensure usability over the entire lifetime of the stamp.
Block and handle shall have a smooth finish to prevent injury to the user.
Front of the stamp shall be readily identified.
Exposed metal components shall be coated or treated to prevent corrosion.

Class A stamps shall have a resilient cushion mounted between the mounting block and the die. Stamps with length or width less than 1/2 inch shall have a cushion at least 1/8 inch thick, recessed into the block at least 1/16 inch. Stamps with length or width greater than 1/2 inch shall have a cushion at least 1/4 inch thick, recessed into the block at least 1/8 inch.

Class B stamps shall have no cushion.

The procurement documents shall specify the following:

1. Class A or class B
2. Any specific material requirements that exist for handle or mounting block
3. Any specific means of identification required for the front of the stamp or the stamp's legend
4. Size of the mounting block
5. Any specific handle finish that is required
6. Legend design: including, as applicable
    a. Size and style of numbers/letters
    b. Wording and number of lines
    c. Size of border, if there is a border

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices, and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The stamps shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
