the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in this specification where such inspections are deemed necessary to ensure supplies and services conform to prescribed requirements.

4.1.1 Responsibility for compliance. All items shall meet all requirements of sections 3 and 5. The inspection set forth in this specification shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the specification shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection, as part of manufacturing operations, is an acceptable practice to ascertain conformance to requirements, however, this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to accept defective material.

4.2 Quality assurance provisions. The contractor shall be responsible for quality assurance in the preparation of the manual. Quality assurance provisions shall be in accordance with MIL-M-85337 to the extent specified herein.

4.3 Validation. When specified by the contracting activity, the contractor shall validate the manual in accordance with the requirements of MIL-M-85337.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The hand receipt publications prepared in accordance with this specification should provide overprinted DA Form 2062 hand receipts covering the line item entry for system/end item and the content of the applicable Components of End Item (COEI), Basic Issue Items (BII), and Additional Authorization List (AAL). This eliminates the need for Army organizations to manually prepare hand receipts for subhand-receipting purposes.

6.2 Acquisition requirements. Acquisition documents must specify the following:

a. Title, number, and date of this specification.

b. Issue of DODISS to be cited in the solicitation, and if required, the specific issue of individual documents referenced (see 2.1.1).

6.3 Data requirements. The following Data Item Descriptions (DID) should be considered when this specification is cited. Also, they should be listed on Contract Data Requirements List (DD Form 1423), if required, except where DOD FAR Supplement 27.475-1 exempts the requirement for a DD Form 1423, (see 4.3.1).

DID number	DID title
DI-M-2196	Validation Certification

The above DID was cleared as of the date of this specification. The current issue of DOD 5010.12-L, Acquisition Management Systems and Data Requirements Control List (AMSDL) must be researched to ensure that only current and cleared DIDs are cited on the DD Form 1423.

6.4 Technical manuals acquisition. This specification must be listed on the Contract Data Requirements List (DD Form 1423) in order to acquire the technical manual described by this specification, except where DOD FAR Supplement 27.475-1 exempts the requirements for a DD Form 1423.
