DATA ITEM DESCRIPTION

Title: CONCEPTUAL ENGINEERING DESIGN DATA

Number: DI-SESS-81001F
AMSC Number: 10694
DTIC Applicable: No
Preparing Activity: AR
Applicable Forms: None

Approval Date: 20260901
Limitations: None
GIDEP Applicable: No
Project Number: SESS-2026-044

Use/relationship: Conceptual engineering design data define general design concepts in graphic form, and include appropriate textual information required for analysis and evaluation of those concepts. They are used to reduce technical uncertainty as to whether or not a technology is feasible or a design concept has potential to meet stated requirements.

a. This Data Item Description (DID) contains the format and content preparation instructions for Conceptual Engineering Design Data resulting from the work task described in 5.4.1.1 of MIL-STD-31000.

b. This DID is applicable to acquisitions of military systems, equipment, and components. It is intended for use primarily during the concept demonstration/validation phase of the DoD materiel life-cycle.

c. It is not intended that all the requirements contained herein should be applied to every program. This DID should be tailored to the minimum data requirements of the applicable contract or purchase order.

d. This DID is related to DI-SESS-81000F, DI-SESS-81002G and DI-SESS-81003F. This DID supersedes DI-SESS-81001E.

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as cited in ASSIST, https://assist.dla.mil , at the time of the solicitation; or, for documents not included in ASSIST, as stated herein.

2. General. Conceptual Engineering Design Data shall be in accordance with MIL-STD-31000.

3. Format. Conceptual Engineering Design Data shall be in the contractor's or Government's format as specified on the TDP Option Selection Worksheet incorporated into the contract or purchase order.

Check the source to verify that this is the current version before use.

4. Content. Conceptual Engineering Design Data shall document an engineering design concept. This data shall indicate whether or not a technology is feasible, or the design concept has the potential of meeting stated requirements.

5. Selection of drawings. The types of drawings to be prepared will vary according to the complexity of the design concept. The TDP Option Selection Worksheet incorporated in the contract or purchase order will specify whether the contractor or the Government is responsible for selecting the types of drawings to be used. Associated lists are not required, but may be used if necessary to meet the information content requirements of para 4 above.

6. CAGE code and document numbers. Conceptual Engineering Design Data shall be identified with the contractor's CAGE code and contractor document numbers or with a Government CAGE code and Government document numbers as specified in the TDP Option Selection Worksheet incorporated in the contract.

End of DI-SESS-81001F.
