MIL-C-50243 (PA)
Amendment 6
25 March 1974
SUPERSEDING
Amendment 5
18 January 1974

MILITARY SPECIFICATION

CARTRIDGE, 40MM, HE, M383

LOADING, ASSEMBLING AND PACKING

This Amendment forms a part of Military Specification MIL-C-50243 (PA), dated 4 August 1971, and is approved by all Departments and Agencies of the Department of Defense.

a. Delete "Paragraph 3.6" in its entirety.

b. Paragraph 4.3.2.1.-Delete defect characteristic "Minor 201" in its entirety. Delete "Major: None defined" and substitute: "Major 100% Inspection

101.	Closing cup missing	Visual	01001"

c. Paragraph 4.3.2.7.-Delete "six (6)" and substitute "four (4)".

d. Delete "Paragraph 4.3.3.7." in its entirety.

e. Paragraph 4.3.3.8.-Delete "One (1)" and substitute "two (2)". Delete "batch" and substitute "five gallon container (45 lbs)".

f. Delete "paragraph 4.3.3.11" in its entirety.

g. Delete "paragraph 4.3.3.14" in its entirety and substitute the following:

"4.3.3.14 Air pressure (see para 3.3) Major Defect, Code No. 25001.- The sampling plan for this test shall be in accordance with MIL-STD-105, Code Letter P, single plan, with an AQL of .015 percent applied to case-to-projectile joint and base plug - primer joint; or AQL of .40 percent shall be applied to the fuze-to-projectile joint. (MIL-STD-1235, CSP-2, Code Letter K may be used with AQL's as stated above). The test shall be performed as specified in 4.4.12 using equipment in accordance with 4.3.4".

h. Paragraph 4.3.3.15.-Change last sentence to read as follows: The sample cartridges shall be selected at random prior to linking and then linked with the same lot of links to which its respective end item lot has been assembled."

AMENDMENT 6

i. Delete "paragraph 4.3.3.16" in its entirety and substitute the following:

"4.3.3.16.-Initial production test plan (Informational test only). Code No. 27001.-When the provisions of AMCR 700-34, which require Initial Production Testing, apply such testing shall be accomplished in accordance with 6.14."

j. Paragraph 4.3.3.17.-Add the following sentence: "The sample cartridge shall be selected at random prior to linking and then linked with the same links to which its respective end item lot has been assembled."

k. Paragraph 4.3.3.17.-Delete "three hundred (300)" and substitute "one hundred (100)."

l. Paragraph 4.3.3.17.1
a. Delete "Twenty (20)" and substitute "Five (5)".
b. Delete "500" and substitute "300".

m. Paragraph 4.3.3.17.1.1.-Delete in its entirety.

n. Delete "Paragraph 4.4.5" in its entirety.

o. Delete "Paragraph 4.4.9" in its entirety.

p. Paragraph 4.4.13.-Delete "one round per minute" and substitute "two (2) rounds per minute".

q. Paragraph 4.4.13.-After "no test" rounds, add "shall also be reported". "No test" rounds shall also be recorded as "no test" rounds outside the impact area or "no test" rounds."

r. Delete paragraph 4.3.3.19" in its entirety.

*s. Add the following paragraph:

"4.3.3.2.1 Propellant weight of case, cartridge (See Dwg. 8886327), Alternate Method, Code No. 13002.-At the start of production, 380 consecutive samples per station per machine shall be selected and weighed 100 percent. All samples shall comply with the applicable drawing requirement. If all samples comply with the applicable drawing requirement, five (5) samples per station every 2 hours production shall be selected and the average weight of the five (5) samples must meet the assessed mean propellant weight within ± 30 mgs. If the average weight fails to
