MILITARY SPECIFICATION

INSECTICIDE, D-PHENOTHRIN (AEROSOL)

This amendment forms a part of Military Specification MIL-I-51484(EA), dated 20 January 1982, and is approved for use by US Army Armament, Munitions and Chemical Command, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 2

2.1.1: Delete the reference to MIL-STD-1188 from the list of military standards.

2.2: Add to the end of the list of ASTM Standards the following:

"ASTM D3951 - Commercial Packaging".

PAGE 3

3.3, lines 7 to 12: Delete "Each aerosol call shall also be supplied . . . and shall conform to one of the following three models:" and substitute "Each aerosol can shall be supplied with a snug-fitting, 5-inch long plastic extension tube attached to the side of the can. The extension tube shall have a nominal 0.040-inch inside diameter. If the standard actuator does not accept the extension tube, an additional actuator for the extension tube shall be supplied for each aerosol can. The valve system shall be of the vertical action "sliding" gasket, valve type and shall conform to one of the following four models:".

PAGE 4

After model (c) and before table II add the following new model:

(d) Newman-Green Ltd.
Valve: R10-118-4-9/16 (see dip tube)
Standard actuator (accepts extension tube): 102-20-18
Mounting cup: regular 1 inch (flowed-in-gasket)
Stem: 0.016 inch diameter orifice
Gasket: neoprene
Spring: stainless steel
Valve body: 0.080 inch inside diameter
Dip tube: proper length to empty can contents
