	A O/L WIDTH	B O/L LENGTH	C LENGTH	DIAMETER	THREAD SIZE
MS36019-1	5	8	20	3/8	3/8-16UNC
MS36019-2	6	9	24	1/2	1/2-13UNC
MS36019-3	6.5	11	36	1/2	1/2-13UNC
MS36019-4	4	6	18	5/16	5/16-18UNC

MATERIAL: Base shall be ungalvanized cast iron, heavy carbon or stainless sheet steel, or epoxy resin.

Rods shall be carbon or stainless steel, Type 302 or aluminum alloy, Type 6061 or 2024.

(Type of material for construction to be specified at invitations for bid.)

FINISH: Base shall be finished with chemical and corrosion-resisting black baked enamel or heavily japanned black.

Rods shall be copper coated on carbon steel and anodized for aluminum.

DESIGN: Tapped hole in the cast iron or epoxy bases, located midline approximately one inch from edge of width dimension, shall be threaded to mate with threads of support rods. The threading of the holes shall project into a boss located directly beneath the under surface of the base. Threading shall be of sufficient length to permit insertion into complete depth of boss, approximately 5/16 inch (See Detail A) or of sufficient length to permit insertion of rod into a partial boss (See Detail B) in such a manner that the threaded portion of the rod will extend sufficiently below the partial boss to accommodate a nut.

Legs on the four corners of the cast bases shall be integral with the base or securely attached to the base and elevate it approximately one inch.

Steel bases shall be made of 0.128±0.010 inch thick sheet steel with a tapped hole in the center of the short side, approximately one inch from the edge, for the vertical rod. The steel bases shall be formed with wide table rests. Threads shall be in accordance with Federal Handbook H28 Unified National Coarse Thread Series.
