INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

TRUCK, HAND, SHELF
(TRAY-SERVICE AND GENERAL UTILITY)

This interim amendment was developed by the General Services Administration, Federal Supply Service, Washington, DC 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this interim amendment as a valid exception to Federal Specification KKK-T-1286A, dated April 17, 1974.

PAGE 4

Add paragraph 4.3.3:

4.3.3 Lateral pressure. Place a maximum working load on the center square foot area of each shelf. The pressure required to move the fully loaded truck from a standing position shall be in compliance with 3.7.
