FEDERAL SPECIFICATION

STEEL, CARBON: STRUCTURAL SHAPES; PLATES; AND BARS

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE

1.1 This specification covers carbon steel shapes, plates, and bars of structural quality.

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

Military Standard:

MIL-STD-163 - Steel Mill Products, Preparation for Shipment and Storage.

(Copies of Military Standards required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposal shall apply.

American Society for Testing and Materials (ASTM) Standard:

A36 - Structural Steel.

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa., 19103.)

(Technical society and technical association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.)

3. REQUIREMENTS

3.1 Description. The structural shapes, plates, and bars shall be in accordance with ASTM A36. When specified (see 6.2), copper-bearing steel shall be furnished.

3.2 Dimensions. Dimensions, weights, and cross-sectional designations for the structural shapes, plates, and bars shall be as specified (see 6.2).

3.3 Identification marking. Marking shall be in accordance with ASTM A36.

FSC 9510, 9515, 9520

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Classification of inspection. Inspection shall be classified as follows:

(a) Quality conformance inspection (see 4.3).
(b) Inspection of preparation for delivery (see 4.5).

4.3 Quality conformance inspection.

4.3.1 Lot. Unless otherwise specified, a lot shall consist of structural shapes, plates, or bars from the same heat or blow submitted for inspection at one time.

4.4 Inspection procedure.

4.4.1 Examination and tests. Examination and tests shall be as specified in ASTM A36. Nonconformance to 3.1 shall constitute failure of the examination and tests.

4.5 Inspection of preparation for delivery. The preservation, packaging, packing, and marking shall be inspected to determine compliance with MIL-STD-163.

5. PREPARATION FOR DELIVERY

5.1 Preservation, packaging, and packing. Preservation, packaging, and packing shall be in accordance with MIL-STD-163, level A or C as specified.

5.2 Marking. In addition to any special marking required in the contract or purchase order, marking for shipment shall be in accordance with MIL-STD-163.

6. NOTES

6.1 Intended use. The structural shapes, plates, and bars are intended for use in riveted, bolted, or welded construction of bridges and buildings and for general structural purposes.

6.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents.

(a) Title, number, and date of this specification.
(b) When copper-bearing steel is required (see 3.1).
(c) Dimensions, weight, and cross-section required (see 3.2).
(d) Lot if other than as specified (see 4.3.1).
(e) Level of preservation, packaging, and packing required (see 5.1).

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
