DATA ITEM DESCRIPTION
Title: TECHNICAL ASSIST VISIT REPORT

Number: DI-MGMT-82217
ASMC Number: N9939
DTIC Applicable: No
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20180501
Limitation: NA
GIDEP Applicable: No
Project Number: MGMT-2018-037

Use/relationship: The Technical Assist Visit Report will provide the Government with engineering analysis findings identified by the technical representatives. It will provide immediate reporting of failure and subsequent details and corrective action recommendations.

This data item description (DID) contains format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

1. Format. The report shall be the contractor's format

2. Content. The report shall contain the following sections:
   a. Equipment analyzed
   b. JSN
   c. CASREP information, if applicable
   d. Start Date
   e. End Date
   f. Identity of the SWRMC Technician performing the analysis: name, grade, rank and email address
   g. Identity of the SHIPS Technician performing the analysis: name, grade, rank, and email address.
   h. Identity of the person that will be providing the out brief: name, grade, rank and email address.

2.1 Report deficiencies. Identify all deficiencies found on the applicable equipment analyzed

2.2 The report shall include all findings and include detailed recommendations for corrections to the problem(s) found.

2.3 The report shall identify all planned maintenance system (PMS) checks made.

2.4 All applicable technical reference documents needed for use of each repair shall be specified.

2.5 List the total amount of training that shall be required, include skill levels, and appropriate FTEs needed.

End of DI-MGMT-82217
