DATA ITEM DESCRIPTION
Title: CONCURRENT ENGINEERING SUPPORTABILITY ANALYSIS (CESA) REPORT

Number: DI-PSSS-82214
AMSC Number: N9936
DTIC Applicable: No
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20180430
Limitation: N/A
GIDEP Applicable: No
Project Number: PSSS-2018-013

Use/relationship: The Concurrent Engineering Supportability Analysis (CESA) is the analytical process utilized to influence design of the Ship throughout its life cycle and represents the most current Ship configuration, providing specific support requirements to ensure the Ship will meet all mission profiles. The CESA process will be continuously monitored and evaluated by the Government as feedback is provided what will migrate to design and process changes, which will improve the effectiveness of the Ship's logistic support.

This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

1. Format. The CESA Report shall be in contractor's format.

2. Content. The CESA Report shall contain the following:

a. Hierarchical Structure Code (HSC)
b. Allowance Parts List (APL)/Allowance Equipage List (AEL)
c. APL/AEL Nomenclature
d. Provisioning Document Control Number (PDCN)
e. Functional Block Diagrams (FBD)
f. Functional Failure Analysis (FFA)
g. Failure Modes, Effects and Criticality Analysis (FMECA)
h. Tiger Model
i. Functional Requirements Identification
j. Provide Alternative Support Concepts
k. Maintenance task Analysis
m. Provide report of Readiness Based Sparing recommended systems
