DATA ITEM DESCRIPTION
Title: LOGISTICS PLAN

Number: DI-SESS-82178
AMSC Number: N9893
DTIC Applicable: N/A
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20180301
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2018-009

Use/Relationship: The Logistics Plan provides the Government with details on the contractor's plans for Operation and Maintenance (O&M) of a specific system. This plan will help the government assess the long-term affordability of the system.

This data item description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

Format. The Logistics Plan shall be in contractor's format.

Content. The Logistics Plan shall contain the basis for estimating the O&M impact of introducing a new capability on the range. The Logistics Plan shall include the following sections:

Section 1. Maintenance Planning. This section shall include information for the following:

- Level of repair for equipment (i.e., component, card, box replacement, etc.).
- Requirements for preventive maintenance.
- Type, description, and amount of recommended spares.
- Maintenance and support agreement recommendations and associated costs.

Section 2. Support and Test Equipment. This section shall identify the recommended test equipment, specialized tools, and system-specific support equipment.

Section 3. Operations and Maintenance Documentation. This section shall identify the following:

- New documentation that is recommended for operating and maintaining the system.
- Recommended Procedures and Work Instructions for the system.
- Any external documents (e.g., Range User's Manual) that shall be updated.

Section 4. Manpower, Personnel, and Training. This section shall identify the following:

- Required staffing to operate the system, including quantity, type of personnel, and work center.
- The maintenance tasks and who shall perform the maintenance, including quantity, type of personnel, and work center.

Check the source to verify that this is the current version before use.

- Internal and external training recommendations and identification of personnel that require the training.

Section 5. Computer Resources Support. This section shall identify the following:

- A description of required ongoing Information Assurance responsibilities for the system, and identify personnel that shall handle them.
- Any impact to administrative computing requirements.

Section 6. Facilities. Any possible impact to facilities (such as space, power, HVAC, security, etc.) shall be specified in this section.

Transportation & Storage. The information contained in this section shall identify:

- Any special transportation required for equipment or personnel (e.g., helicopter, heavy equipment, etc.).
- Special storage space that is needed.

Ongoing Support. The information contained in this section shall identify other elements related to ongoing support of the system as appropriate.

End of DI-SESS-82178
