DATA ITEM DESCRIPTION
Title: Operation and Maintenance (O&M) Impact Estimate

Number: DI-SESS-82179
AMSC Number: N9894
DTIC Applicable: N/A
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20180301
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2018-010

Use/Relationship: The O&M Impact Estimate is used to assess the long-term affordability of new systems, and to assist in budgeting activities and reallocation of resources. The O&M Impact Estimate quantifies the projected impact of a change in range capabilities, due to an addition or removal of equipment, alteration of operating hours, or any other proposed modification to the baseline range capabilities defined in the contract.

This data item description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

Format. The O&M Impact Estimate shall be in contractor's format.

Content. The O&M Impact Estimate shall include the following:

Estimated annual labor hours for each position impacted, with separate estimates for preventive maintenance, corrective maintenance, and operation.

Estimated annual material costs.

Estimated annual Other Direct Costs (ODC).

A brief justification for the estimates.

A list of all references (i.e., tasking, e-mail, SRR minutes, Logistics Plan, etc.) that were used to establish the scope of the change.

The estimate shall also include information about multiple related systems when applicable. For example, information in this section could provide an explanation for a proposed reduction in an existing capability to offset increased costs related to a new capability.

End of DI-SESS-82179
