7 APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the Outfitting Operations Plan resulting from the work task described by 4.1 of MIL-STD 1339.

7.2 This DID is applicable to ship acquisition, conversion, and modernization programs.

7.3 It is not intended that all requirements contained herein (Continued on Page 2)

8 APPROVAL LIMITATION	9a APPLICABLE FORMS	9b AMSC NUMBER

10 PREPARATION INSTRUCTIONS

10.1 General. The Outfitting Operations Plan shall document in detail the contractor's plan for accomplishing the Fitting Out Procedures specified in the contract. The plan shall consist of three parts: Part I providing preliminary planning information regarding the initial off-load of materials in conversion and modernization programs; Part II shall provide planning information regarding the processing of outfitting material and allowance items during the ship conversion, modernization, or construction period; and Part III shall provide details relating to the planning, procedures, and control of outfitting material and allowance items during the actual shipboard loading process.

10.2 Content requirements.

10.2.1 Outfitting operations plan, part I. This part of the plan shall be required in major conversion and modernization programs. It shall include the following:

10.2.1.1 Procedures. Detailed description of the procedures to be used for the off-load, identification, inspection, warehousing, and integration of materials off-loaded into the total outfitting plan presented in the Outfitting Operations Plan, Parts II and III. A functional flow chart detailing these procedures and a schedule and milestone plan for accomplishing the procedures shall be included. Particular emphasis shall be placed on the following: (Continued on Page 2)

11 DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

7. APPLICATION/INTERRELATIONSHIPS (Cont'd)

should be applied to every program. Portions of this DID are subject to deletion tailoring depending upon the program in which it is applied in the solicitation/contract.

7.4 This DID supersedes DI-V-2020, Outfitting Operations Plan

---

10. PREPARATION INSTRUCTIONS (Cont'd)

a. Procedures for identifying unmarked material with NSNs/NICNs, including the identification of the source/reference documents that will be used in the process.

b. Procedures for determining and handling non-ready-for-issue (Non-RFI) material.

10.2.1.2 Records and files. Description of the purpose, content, and use of the records, files, listings, and other documentation related to the performance of off-load operations. The description shall include all internal records, files, listings, and documentation used by the contractor in the accomplishment of the off-load requirements of the contract specifications.

10.2.2 Outfitting operations plan, part II. This part of the outfitting operations plan shall describe in detail the procedures and records to be used in asset management and material processing prior to loading aboard the ship.

10.2.2.1 Asset management procedures. Detailed description of procedures to be used in identifying, accounting for, controlling, and reporting baseline and residual assets. Particular emphasis shall be placed on procedures for:

a. Initializing and modifying Baseline Asset File (BAF) and Residual Asset File (RAF) records.

b. Applying residual assets to BAF requirements.

c. Identifying and cross-referencing substitutes and other selected BAF records to prime BAF record national stock numbers (NSNs).

d. Controlling issues and replacements of storeroom item (SRI) and operating space item (OSI) assets.

e. Applying due-in contractor-furnished (CF) and government-furnished (GF) orders to BAF requirements.

f. Processing Allowance Appendix Pages (AAPs) SRI and OSI requirements into the BAF.

g. Integrating allowance documentation and accumulating and submitting integrated COSAL (I-COSAL) data.

10.2.2.2 Asset management records and files. Detailed description of the purpose, content, and use of the records, files, listings, and other documentation related to the performance of asset management. Describe file structure and interfaces of BAF, RAF, and outstanding order files. Describe input/output (I/O) and

10. PREPARATION INSTRUCTIONS (Cont'd)

application/operation (A/O) procedures related to automated asset processing. Identify the data elements contained in the BAF, RAF, and due-in order records and files.

10.2.2.3 Material processing. Describe in detail the procedures to be used in processing material prior to loading aboard the ship. This part of the plan shall address the following:

a. Facilities. Describe the facilities to be used for material processing and storage. Identify safeguards to be used to prevent co-mingling of material when multiple ships material are handled and stored in same area. Include provisions made for special storage material such as, hazardous, highly pilferable, refrigerated storage, and security storge for controlled drugs, small arms, and classified material.

b. Procedures for processing the following categories of material:

(1) Contractor-furnished (CF) and government-furnished (GF) SRI and OSI in the Coordinated Shipboard Allowance List (COSAL).

(2) Ships Portable Electronic Test Equipment Requirements List (SPETERL)

(3) Medical and Dental Allowance Material

(4) Visual Landing Aids Material

(5) Meteorological Allowance Material

(6) Photographic Allowance Material

(7) General Use Consumables List (GUCL) Material

(8) Forms and Publications Allowance Material

(9) Loose hardware and other miscellaneous allowance lists not covered by the above.

c. Material receipt procedures with emphasis on the following situations:

(1) Partial receipts
(2) Substitutions
(3) Multiple receipts of the same material under different identification numbers.

d. Material inspection procedures with particular emphasis on reporting and handling of the following:

(1) Material damaged in transit
(2) Wrong material - not in accordance with specification requirements
(3) Un-usable material, such as expired shelf life, past expiration date. This also includes material which will be come overage prior to loading aboard ship.

10. PREPARATION INSTRUCTIONS (Cont'd)

e. Procedures for identifying material to appropriate allowance documentation. Include in this segment of the plan appropriate procedures to identify received material to the applicable allowance documentation including allowance appendix pages.

f. Procedures for the segregation of material receipts by the various categories and further segregation of allowance equipage material down to the department or division level of the ship.

g. Procedures for the storage and location of material within the material storage area.

h. Procedures for preparing storeroom layout drawings, establishing stowage mock-up, and acquiring storeroom stowage devices to be used for warehouse mock-up.

i. Procedures for labelling stowage aids and devices with location numbers. Identify the ship stowage location plan to be used for storeroom designations.

j. Procedures for transfer of onboard allowance material from preliminary storage into ship mock-up. Include the handling of the following situations:

(1) Total receipt, range, and depth

(2) Partial receipt with provisions for subsequent receipts to be consolidated to prevent multiple location storage

(3) Receipt of substitute items - both total and partial depth

(4) Subsequent receipt of items under different NSNs/NICNs

(5) Preparation and completion of stock records

(6) Handling and locating of OSI and other bulky material not readily lending itself to bin or drawer stowage

k. Procedures covering the turnover of material to the government representatives including signature and proof of delivery documentation and shortage lists.

l. Procedures for contractor quality assurance/statistical sampling plan to reflect the accuracy of binned material and stock records.

m. Include a schedule and milestone plan for the accomplishment of all actions called for in Part II of the Outfitting Operations Plan.

10.2.3 Outfitting operations plan, part III. This part of the outfitting operations plan shall describe in detail the operations and procedures for the physical turnover to the government, and loading aboard the ship, material required by the various allowance lists. This part of the plan shall address the following:

a. Loading organization and coordination. Provide organization chart and identify names and phone numbers of loading coordinator and key contractor points of

10. PREPARATION INSTRUCTIONS (Cont'd)

contact both at warehouse and dockside. Identify numbers of personnel participating in loading operation allocated by functional area (e.g. warehouse, transportation, rigging, shipboard).

b. Loading schedule. Provide a loading schedule that identifies (1) each category of material to be loaded; (2) the shipboard stowage location into which the material will be loaded; (3) start and completion dates for loading each material category into designed stowage location; (4) hours of the day during which loading operations will be conducted; and (5) schedule variations/alternatives for inclement weather conditions.

c. Loading and turnover procedures. Detailed description of procedures to be used for custodial transfer and loading of outfitting material aboard ship. Particular emphasis shall be placed on the following:

(1) When, where, and how accountability for material shifts from the contractor to the government.

(2) Storeroom key control and turnover procedures.

d. Loading and turnover of records. Detailed description of the records and other documentation which will be used and provided to the government in conjunction with the loading of material.
