NOTES

(1) The ship account number is comprised of two separate data elements. The last five positions represent the unit identification of the ship/activity organizational unit or agency as assigned by NAVCOMPT. For certain applications, the first position may reflect the applicable service designator code. However, for provisioning, allowance, and load list operations, the first position of the ship account number shall be a fixed alpha character as follows:

"R" - For all ships and units afloat
"N" - For all shore stations, activities, and organizational units

Asset cards submitted for all navy shipbuilding/conversion/modernization programs shall contain the character "R" in card column 10.

(2) For items stored in more than one location, separate cards may be submitted showing the quantity at each location.

(3) Indicate CAGE for all part numbers.

(4) Punch card column 39 with numeral one (1) for inventory items of off-load material when applicable.

10. PREPARATION INSTRUCTIONS (Cont'd)

10.1 Content requirements (Cont'd)

(5) Status Code - Punch a numeral one (1) in card column 40 if the quantity shown in card columns 76-79 has actually been received. Leave card column 40 blank for items still "due-in". For partial receipts (e.g., quantity 4 is required but only quantity 1 is received) prepare two cards, punched as follows:

	CC 40	CC 76-79
Card number 1 (for "receipts")	1	0001
Card number 2 (for "due-ins")	Blank	0003

(6) Part/Reference numbers shall be punched if NSN/NICN not available. The absence of an account code and cog symbol in columns 43 and 44 shall indicate that part number is punched in columns 45-75. Dashes shall be punched as 11 (eleven) punches. NSNs/NICNs shall be punched without dashes in columns 46 through 58.
