DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

1 TITLE	2 IDENTIFICATION NUMBER
RE-ENTRY VEHICLE DATA REPORT	DI-MISC-80963

3 DESCRIPTION/PURPOSE

3.1 This report is used to evaluate programs and to provide information required for plannin future R&D and flight test programs.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
900308	F/RMO-SDC		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description contains the format and content preparation instructions for the data product generated by the specific and discrete task requirements as delineated in the contract.

7.2 This DID supersedes DI-T-3723A.

8 APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		A4913

10. PREPARATION INSTRUCTIONS

10.1 Format. The report shall be in contractor's format.

10.2 Content. The report shall contain the following:

a. Narrative description of the tests.

b. Ancillary information relating to the vehicle and its payload.

c. Data summary table, which shall consist of a table for each ground based and/or air borne sensor, listing of applicable test, instrument settings and other appropriate auxiliary information, and the total number of seconds of usable data obtained by each instrument. In addition, include:

(1) A table showing absolute time of acquisition and termination of data from each target vs. each instrument.

(2) A brief description of the test conditions, as follows:

(a) Test number.
(b) Date of test.
(c) Time of lift-off.
(d) Booster type.
(e) Re-entry vehicle.

(continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

(f) Aircraft and ground based sensor position(s).
(g) Range of missile/target.
(h) Re-entry area.

d. Routinely reduced data, including plots and copies of readout records, where appropriate, from reduction processes such as those associated with:

(1) Ballistic camera trajectory reduction.
(2) Spot densitometry.
(3) Spectral identification.
(4) Scintillation frequency.
(5) Radiometric intensity.

e. Summary. This part of the report shall summarize the overall results of the flight test program listing the objectives, the end results, evaluation of the test program based on the contractor's interpretation of the test data, and recommendations for aerospace vehicle equipment or procedure improvement based on the above evaluation.
