DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

2 TITLE	1 IDENTIFICATION NUMBER
CONTRACTOR FURNISHED (CF) OPERATING SPACE ITEM (OSI) REQUIREMENTS REPORT	DI-ILSS -80954

3 DESCRIPTION/PURPOSE

3.1 The CF OSI requirements report identifies to the government contractor-furnished operating space items required by contract specifications, drawings, or other authoritative source documents. The CF OSI requirements provide the basis for development of allowance equipage lists (AELs) and loose hardware lists for special tools, machine tools, accessories, support and test equipment, and other operating space items to be furnished by the contractor.

4 APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a DTIC APPLICABLE	6b GIDEP APPLICABLE
900227	SH/CEL-MS		

7 APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content instructions for the preparation of CF OSI requirement report required by 5.8 of MIL-STD 1339.

7.2 This DID is applicable to ship acquisition, conversion, and modernization programs.

7.3 This DID supersedes DI-V-2159, paragraph 10.2.3

8 APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
	Supply Availability Card NAVSUP Form 1109	N4904

10. PREPARATION INSTRUCTIONS

10.1 General. A supply availability card, NAVSUP Form 1109, shall be keypunched and interpreted for each CF OSI requirement contained in contract specifications, drawings or provisioning technical documentation. At the option of the contractor, and when approved by the government, these data may be provided in magnetic tape form. NAVSUP Forms 1109 provided by the government as a result of coordinated shipboard allowance lists (COSALs), incremental stock number sequence list (ISNSL), or other allowance products may be used provided that any additional data elements required by this DID are added.

10.2 Content requirements. CF OSI requirement cards shall be keypunched and interpreted as follows:

CARD COLUMN(S) KEYPUNCH	INTERPRET PRINT POSITION	DATA TITLE	NOTES
1-2	1-2	Cognizance symbol	(1)
3	3	Material control code	

(Continued on page 2)

7 DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

10. PREPARATION INSTRUCTIONS (Cont'd)

10.2 Content requirements (Cont'd)

CARD COLUMN(S) KEYPUNCH	INTERPRET PRINT POSITION		DATA TITLE	NOTES
4-16	4-19		National stock number	(2)
		4-7	Federal supply class (FSC)	
		9-10	National codification bureau (NCB) code	
		12-19	National item identification number (NIIN)	
17-18	20-21		Special material identification code (SMIC)	(3)
17-22	20-25		Item nomenclature (first 6 digits only)	(4)
4-22	4-22		Reference number	(5)
23	33		Material category code	(6)
24-25	24-25		Unit of issue	
34-46	34-46		Repairable identification code (RIC) or application	(7)
49-52	47-50		COSAL allowance quantity/quantity required	(8)
58-68	35-45		Secondary identification field	(9)
76-80	52-56		Unit identification code (UIC) Required	

NOTES

(1) Keypunch and interpret "P" in cc 1 if a reference number (Mfg., Part No.) is in cc 4-22.

(2) The NSN shall be interpreted in cc 4-19 with blank spaces left in cc 8, 11, and 15.

(3) When a SMIC is used, an asterisk (*) shall be punched and interpreted in cc 22.

(4) Item nomenclature (first 6 positions) shall be used only with an NSN and when a SMIC is not used.

(5) Item identification number, other than NSN, such as manufacturer's part number, drawing, plan, and piece number. Use only when NSN is not available. SMIC or item nomenclature shall not be punched when a reference number is punched.

Check the source to verify that this is the current version before use.

(6) The material category code (MCC) shall be entered to identify the general nature or category of contractor-furnished OSI. One of the following codes will be used:

CATEGORY	CODE
Piping System	3
Electrical	4
Machinery	5
Electronics and Ordnance	6
Hull and others	2

(7) Component identification designator (CID/APL/AEL/allowance appendix page (AAP)) number to which this item applies. Omit dash in punch cc 37 for AEL numbers. Number left justified. When no RIC applies to an item, another identifying allowance list number may be used (e.g., "35 QF 2-2") for certain aeronautical IOL items. When no allowance list number is applicable, the contractor shall enter data required to identify the item to its shipboard application such as parent equipment, shop, compartment, or other operating space or end use.

(8) This field may be filled on NAVSUP Form 1109 received from the government which identify an item to a specified COSAL RIC or application. When the contractor furnished (CF) quantity to be provided differs from that contained on a particular card, the quantity shall be modified or a new card prepared as necessary to indicate the CF quantity to be provided. When a single OSI applies to more than one RIC/application, a separate card shall be prepared showing the total CF quantity for each such application. When new cards are prepared, all data contained on the cards provided by the government shall be perpetuated. For those OSI not applicable to a government allowance list, where no card is received from the government but for which the contractor has procurement responsibility, enter the total quantity of each item that the contractor is responsible to provide for each shipboard application or end use. These items may be required as the result of contract ship specifications, drawings, or of equipment/component acquisition or fabrication.

(9) This field shall not be used when a RIC is used in punch cc 36-46. When a RIC is not available, information shall be entered in this field to identify the authority requiring acquisition of the item by the contractor. The information may consist of the applicable equipment drawing and plan-piece number, provisioning technical documentation (PTD) number, or contract specification (section, page, line) identification.
