10. PREPARATION INSTRUCTIONS

10.1 General requirements. The COSAL/BAF-SRI report shall consist of a printed listing which shall be segregated into the following sections or categories, each of which shall be titled accordingly:

a. SRI allowance range excesses. This category shall consist of those items shown in the contractor's BAF-SRI for which there is no corresponding COSAL allowance requirement and, therefore, no stock number or part number match.

b. SRI allowance range deficiencies. This category shall consist of those items for which COSAL allowances exist, but no stock number or part number match was made when compared to the contractor's BAF-SRI.

c. SRI allowance depth deficiencies. This category shall consist of those items for which a stock number or part number match exists between the COSAL and the contractor's BAF-SRI, but the BAF-SRI allowance quantity is less than the COSAL allowance quantity.

d. SRI allowance depth excesses. This category shall consist of those items for which a stock number or part number match exists between the COSAL and the contractor's BAF-SRI, but the BAF-SRI allowance quantity is greater than the COSAL allowance quantity. (Continued on Page 2)

10. PREPARATION INSTRUCTION (Cont'd)

10.2 Content requirements. The listings shall be in the contractor's format. Items within each section or category of the listing shall be in national item identification number (NIIN) sequence with part numbers in alphanumeric sequence at the end. Each section of the listing shall contain the following information and shall be captioned accordingly:

a. NSN, NICN or part number. Include the cognizance symbol, material control code, national stock number (NSN), or navy item control number (NICN) and special material identification code (SMIC) when applicable. For part numbers (reference numbers), the commercial and government entity (CAGE) code shall be included following the part number.

b. Nomenclature or bin number. Item nomenclature as appearing in the COSAL stock number sequence list (SNSL) or incremental SNSL (ISNSL) or other government allowance document. Where there is no allowance application, nomenclature and bin number data are applicable to asset record information.

c. Repairable identification code (RIC). Allowance parts list (APL) or allowance equipage list (AEL) or allowance appendix page (AAP) number.

d. Supplier's code. Procurement responsibility for the item (e.g., CF or GF).

e. ATC. Allowance type code indicated in the allowance requirements (e.g., "1") for all COSAL or ISNSL items.

f. Asset UI. Unit of issue shown in BAF-SRI.

g. Allowance UI. Unit of issue shown in the COSAL.

h. Purchase order or requisition number. All acquisition source document numbers with individual ordered quantities shall be listed for each item "due-in".

i. On hand. Quantity of asset on hand.

j. Due-in. Quantity of asset due-in.

k. Total quantity. The total quantity of i and j above.

l. Allowance quantity. The total quantity of the allowance shown in the COSAL.

m. Allowance range excess quantity. The quantity shown in k above. Applies only when l is blank.

n. Allowance range deficiency. The quantity shown in k above. Applies only when i, j, and k are blank.

o. Allowance depth deficiency. Applies only when the quantity shown in k above is less than the quantity shown in l.

p. Allowance depth excess. Applies only when the quantity shown in k above is greater than the quantity shown in l.
