COMMERCIAL ITEM DESCRIPTION

SOCKS, HEAVYWEIGHT, ALL WEATHER

The General Services Administration has authorized the use of this commercial item description for all Federal agencies.

1 SCOPE.

This commercial item description covers the requirements for an all weather, heavy weight sock. The sock is designed to be worn over top of a wicking liner sock as part of a system configuration that wicks moisture form the foot and provides insulation. This configuration shall be worn with either an insulated or an uninsulated boot.

2 CLASSIFICATION. The socks shall be one type in the following sizes:

Sizes: 9 10 11 12 13 14 15

3 SALIENT CHARACTERISTICS.

3.1 Description. The socks shall be constructed of high density reversed terry knit to provide insulation, resilience and loft. The nap is reversed and worn on the outside of the sock to provide maximum thermal properties. The cuff shall be 1X1 mock rib. The color shall be olive drab blended with a natural polypropylene.

3.2 Material. The yarn for the sock shall be a blend of 50% wool (48's grade) and 50% polypropylene (3 denier, 3 inch cut). The single size shall be 140 grams for 100 yards (8.93 worsted count) with 8 to 8.5 turns per inch with 3 ends used in the foot to 3 inches above the center heel

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: DLA Troop Support, Clothing and Textiles Directorate, Attn: FQSE, 700 Robbins Ave, Philadelphia, PA 19111. Since contact information can change, you may want to verify the currency of this address using the ASSIST Online database at https://assist.dla.mil.

gore. Two ends of 50/50 blend are used with one end of 3/70's s denier nylon from the 3 inch mark (as above) to the bottom of the 2 inch 1X1 cuff. The cuff shall be constructed of 435P elastic rubber for 2 ends of the 50/50 blend.

3.3 Knitting. The socks shall be knitted on a 5.0 inch diameter head, a single cylinder, 72 needle terry knitting machine. The knit shall be a high-density reversed jersey with a 15 courses per inch vertical with a reciprocated heel. The top shall be 2 inch 1X1 mock rib by 3.5 inches wide, with 13 courses per inch.

3.3.1 Toe seam. The toe seam shall be an arch form (fish mouth closure) and sewn using 2/100's stretch nylon (diagram A, figure 1).

3.4 Physical requirements. The socks shall conform to the requirements in accordance with Table I.

TABLE 1. Physical Requirements

CHARACTORISTICS	REQUIREMENTS	TEST METHODS
Lengthwise stretch: Foot Leg	 No greater than 1-3/4 inches horizontally No greater than 1-1/2 inches vertically No greater than 8 inches horizontally	1/
Weight ounces per pair. Size 9 10 11 12 13 14 15	 6.7 +/- 0.3 7.0 +/- 0.4 7.2 +/- 0.4 7.7 +/- 0.4 8.0 +/- 0.4 8.2 +/- 0.4 8.7 +/- 0.5	2/
Foot length (Size) 9 10 11 12 13 14 15 Sock height	 9 10 11 12 13 14 15 12-1/2 all sizes	3/ 4/

1/ Each sock shall be tested for fit per Appendix A. Use of Foot Forms, Procedure A, of the current edition of the National Association of Hosiery Manufacturer (NAHM) Sizing standard.

2/ Unpackaged socks only.

3/ Foot length: measure from the back of the heel gore to the end of the toe.

4/ Sock height shall be measured from the bottom of the heel gore at the top of the sock (see figure 2).

3.7 Label/marking. Each sock shall have a sewn-on combination size and care label placed below the cuff on the outside (reverse terry) of the sock. The size label shall be printed with characters a minimum of 5/16 inch in height and contain the following information: sock size, legend, contract number and NSN. The label shall include the following care labels instructions; wash in warm water, no bleach. No softener in the washer or dryer. As an alternate, the information may be provided on the commercial band.

3.7.1 Label/tag. All socks shall be banded in packages of one pair with a printed bar code or a bar code label attached to each item, clearly legible and readable by a scanner. The bar coding element shall be a 13 digit national stock number (NSN). The bar code type shall be a medium to high code density and shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

4 REGULATORY REQUIREMENTS.

The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5 QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description and conforms to the producer's standards and quality assurance practices, and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

5.2 Visual examination. Each sock shall be examined for the defects listed below:

Defects. Any hole, cut, or tear; any degree of degradation of the elastic top; any thin areas, mends, frayed, or raveled; noticeable variation in shade between two socks of a pair; noticeable variation in size (length and width) in a pair; knit construction of sock not as specified; any spot or stain (outside); any run or drop stitches, including holes looping or seaming; any material defects, distorted parts or poor workmanship; any component part omitted; marking missing, incorrect, or illegible; measurement of item not as specified; Non-uniform in appearance, bar code omitted or not readable by scanner; human-readable interpretation (HRI) omitted or illegible; bar code not visible on folded, packaged item; bar code causes damage to the item; any items not packaged in accordance with the contract or purchase order.

5.3 Acceptance criteria. Acceptance criteria shall be as specified in the contract or purchase order.

6 PACKAGING.

The preservation, packing, and marking shall be as specified in the contract or order.
