COMMERCIAL ITEM DESCRIPTION

PARKA, SNOW CAMOUFLAGE, WHITE

The General Services Administration has authorized the use of this commercial item description as a replacement for MIL-P-10809 for all Federal agencies.

1. SCOPE. This commercial item description covers a lightweight snow camouflage white parka with a self-storage pouch.

2. SALIENT CHARACTERISTICS

2.1 Description. The parka is an overgarment containing front hand openings with snap down flaps, snap fastener front closure, a self-storage pouch with a tab attached to center back neck. The parka has elastic wrists, drawcord at waist, hood, and two drawcord systems at bottom hem to tie under each leg.

2.2 Materials.

2.2.1 Basic material. The cloth for the parka shall be white, lightweight, shrink resistant, wind resistant, and water repellent. The cloth shall show a fluorescent optical brightener with a resulting peak emission in the blue violet spectrum. The hue of fluorescence shall be the same as that of the standard sample when compared under ultra-violet light.

2.2.2 Drawcord. The drawcord for the hood, bottom hem, waist and storage pouch shall have a minimum diameter of 4/32 inch, have sufficient strength for repeated tying and untying, and shall be water repellent. The color of the drawcord shall match the parka. The lengths shall be sufficient for tying securely and the ends shall not ravel.

2.2.3 Wrist elastic. The elastic shall be sufficient for continuous expansion and relaxation, and when relaxed, shall allow for comfort at the wrist.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FNS, 2800 South 20th Street, Philadelphia, PA 19145-5099.

AMSC N/A **FSC 8415**

DISTRIBUTION STATEMENT A. ***Approved for public release; distribution is unlimited.***

Check the source to verify that this is the current version before use.

2.2.4 Cord closure. The hood and waist drawcords shall contain a suitable, white, plastic cord closure with locking and unlocking capabilities.

2.2.5 Snap fastener. The snap fasteners for the front closure and the front hand opening flaps shall be a socket and stud set type with white, chip-proof, colorfast enamel cap, capable of withstanding repeated snapping and unsnapping.

2.2.6 Thread. A suitable white, water repellent thread shall be used for seams and stitching.

2.2.7 Label/marking. Suitable commercial type labels may be used. The printing shall be permanent and clearly legible. The printing shall not show through from the outside. The label shall be located inside of the right back, positioned not more than 1 inch below hood joining seam and 1/2 inch away from center back seam (See figure drawing). The label information shall be as follows:

2.2.7.1 Size and Identification label. Each parka shall contain a size/identification label.

2.2.7.1.1 Size. The applicable size information shall be as follows:

X-Small	**Small**
Chest: Up to 33 inches Stock No. NATO Size: 7080/7484	Chest: 33 to 37 inches Stock No. NATO Size: 7080/8494
Medium	**Large**
Chest: 37 to 41 inches Stock No. NATO Size: 7080/9404	Chest: 41 to 45 inches Stock No. NATO Size: 7080/0414
X-Large	
Chest: From 45 inches up Stock No. NATO SIZE: 7080/1424	

2.2.7.1.2 Identification. The identification information shall follow the above size information and shall be as follows:

PARKA, SNOW CAMOUFLAGE, WHITE
CONTRACT NO.:
CONTRACTOR'S NAME (OPTIONAL)

2.2.7.2 Instruction label. The instructions label may be separate or combined with the size and identification. If separate, the instruction label shall be situated the same but not more than 1/2 inch below the size/Id label. The instructions information shall be as follows:

PARKA, SNOW CAMOUFLAGE, WHITE

1. For camouflage only - not a substitute for outer garment.
2. Wear hood over all headgear including helmet.
3. Tie bottom drawcord around each leg.
4. Brush off snow and frost before entering heated shelters.

Check the source to verify that this is the current version before use.

5. Machine/hand laundering. The parka is to be laundered using wash and wear setting, in warm (90 degree F) with phosphate detergent, when not restricted. Rinse three times. Wash darks separately. Dry by tumble drying at the permanent press setting (temperature not to exceed 90 degrees F) or use a clothes rack, line, or non-metal hanger to drip-dry the parka.

CAUTION

Do not use chlorine bleach or starch. Discoloration and degradation of infrared protection capacity of the material will result.

6. Field laundering. The parka is to be laundered using Formula II of FM 10-280. Dry the parka by tumble drying at the permanent press setting (temperature not to exceed 90 degree F). Do not press this item.

DO NOT REMOVE THIS LABEL

2.3 Label/tag. Each item shall be individually bar-coded with a paper tag for personal clothing items. The paper tag shall be standard bleached sulfate. The paper used for the tags shall have a smooth finish to accept thermal transfer and direct printing. The tags shall be attached to each item, clearly legible and readable by a scanner. The bar coding element shall be a 13 digit national stock number (NSN). The bar code type shall be a medium to high code density and shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

2.4 Standard sample. Standard samples, if available, may be obtained from the procuring activity issuing the invitation for bids.

2.5 Figure. Figure 1 is furnished for guidance and information. If variations appear between the figure and the written requirements, the written requirements in this document shall govern.

2.6 Patterns. The Government shall furnish a complete set of patterns or a master pattern with grade rules, to maintain uniformity and consistency in form, fit and function. The Government patterns may be used to create the contractor's working patterns. Minor modifications are permitted to accommodate manufacturing procedures, however, the design and finished measurements must be maintained.

2.7 List of pattern parts. The component parts of the parka, which are listed in Table I shall be cut from the material, specified in paragraph 2.2.1.

Table I. List of pattern parts

Nomenclature	Cut parts	Nomenclature	Cut parts
Front	2	Storage Pouch	1
Back	2	Storage pouch tab	1
Sleeve	2	Back waist tunnel	1
Front facing interlining	2	Front waist tunnel	2
Front hand opening flap	2	Hood	2
Front hand opening facing	2

Check the source to verify that this is the current version before use.

2.8 Configuration. The manufacturing requirements in 2.8.1 and 2.8.2 shall be used to ensure uniformity in the appearance and quality of the parka.

2.8.1 Seams and stitching. All stitching visual from the outside shall be 10-14 stitches per inch. All component joining seams shall be double-felled. Pocket flap and flap facing shall be set with 1/16 inch single edge stitching. All raw edges shall be finished. Seam efficiency shall be compatible for continuous extreme movement.

2.8.2 Bartacks. 1 bartack through center of hood drawcord tunnel, 2 horizontal bartacks superimposed on bottom hem at edge of front closure (one on right side, one on left side). See figure for more bartacks.

2.9 Sizes and measurements. The finished parka shall conform to the following measurements:

Table II. Finished measurements (inches)

	X-Small	Small	Medium	Large	X-Large	Tolerance
1/2 face opening opening 1/	20-1/4	20-1/4	20-1/4	20-1/4	20-1/4	± 1/4
Sleeve length 2/	27-1/2	27-3/4	27-7/8	28	28-1/8	± 1/2
1/2 chest 3/	26-1/2	28-1/2	30-1/2	32-1/2	34-1/2	± 1/2
Back length 4/	36	36-1/2	37	37-1/2	38	± 3/4
Back vent 5/	5-1/2	5-1/2	5-1/2	5-1/2	5-1/2	± 3/8

1/ Measure from top of hood to bottom edge of hood hem.
2/ Measure from center of sleeve setting seam at shoulder to bottom edge of sleeve.
3/ With parka closed, measure across front at base of armhole, from folded edge to folded edge.
4/ Measure from center of hood joining seam to top of vent opening.
5/ Measure from the top of vent to bottom of parka.

3. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this commercial item description and that the product conforms to the producer's own drawing, specifications, standards and quality assurance practices. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract or purchase order.

4.2. Visual examination. Each parka shall be examined for the defects listed below.

Check the source to verify that this is the current version before use.

Defects. Any hole, cut, or tear; color not as specified; any part shaded; any spot or stain (outside); raw edges, open seams, thread ends not removed, or loose or tight seams; any material defects, distorted parts or poor workmanship; any component part omitted; any component part not functioning properly, defective components, label missing, incorrect, or illegible; measurement of item not as specified; bar code omitted or not readable by scanner; human-readable interpretation (HRI) omitted or illegible; bar code not visible on folded, packaged item; bar code causes damage to the item; any items not packaged in accordance with the contract or purchase order.

4.3 Acceptance criteria. Acceptance criteria shall be as specified in the contract or purchase order.

5. PACKAGING

5.1 Preservation, packing, and marking. The preservation, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Source of Government documents. Copies of military and Federal documents are available from:
