INTERIM COMMERCIAL ITEM DESCRIPTION

BISMUTH SUBSALICYLATE TABLETS

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

Salient characteristics:

Shall be palatable, sugar-free, chewable Bismuth Subsalicylate Tablets.

Each tablet shall contain the following:

Bismuth Subsalicylate	262 mg
Total Salicylate	100 mg
Total Sodium, not more than	2 mg

Other ingredients such as calcium carbonate, talc, flavoring, sweetening and coloring agents, shall be present in sufficient quantities to enhance the product.

Tablets shall assay to contain not less than 95.0 percent and not more than 105.0 percent of the required amounts of bismuth subsalicylate acid and total salicylate when tested by a suitable, accurate and reproducible method(s). Tablets shall assay, to contain not more than 2 mg of total sodium when tested by a suitable, accurate and reproducible method.

The bidder or offeror shall submit with its bid or proposal the test methods and results for the bismuth subsalicylate, total salicylate and total sodium contents approved by the FDA.

Such methods shall be employed in the testing of the tablets and need not be resubmitted provided the bidder or offeror certifies that there has been no change in formulation or method of manufacture.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Materials used in the manufacture of the tablets shall be of a pharmaceutical grade.

Each tablet shall be marked/embossed with a product identification code to identify the active ingredient(s), strength, and manufacturer. The materials used in marking/embossing the dosage forms shall be acceptable to the FDA. The actual code used for the product shall be left to the discretion of the supplier.

Workmanship. The tablet shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). One package containing 42 tablets, individually sealed in a commercially available blister or strip packaging, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.
