COMMERCIAL ITEM DESCRIPTION

PAD, WITCH HAZEL-GLYCERINE IMPREGNATED

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Interim Federal Specification DDD-P-001024(DSA-DM) which is cancelled.

This Commercial Item Description covers a bland wet dressing or cleansing pad.

Salient Characteristics:

The impregnated pad shall be suitable for use as a bland wet dressing or as a cleansing pad for inflamed surfaces. The pads shall be 3 ± 1/16 inches in diameter and shall be impregnated with the following solution:

Distilled Extract of Witch Hazel, NFXI	50 percent
Glycerin, USP	10 percent
Methylparaben, USP	q. s. 1:1000
Benzalkonium Chloride, USP	q. s. 1:30000
Purified Water, USP	q. s. 100 percent

The solution shall have a pH range of 4.2 to 4.8, buffered if necessary with Citric Acid, USP, and Sodium Citrate, USP, or other suitable buffer.

The pads shall be made from a plain weave, soft cotton, outing flannel, which is double napped, bleached, absorbency treated, and has a minimum weight of 3.35 ounces per square yard. As an alternate, the pad materiel shall be an entangled hydrophilic fiber fabric which is bonded by mechanical entanglement of fibers with or without chemical binders. The alternate fabric shall have a minimum weight of 1.98 ounces per square yard and shall contain a minimum of either 70 percent rayon or 70 percent polyester and the remainder shall be other synthetic man-made fiber. Each pad shall be cut from one thickness of material, shall be thoroughly impregnated and the finished pad shall be non-toxic. The weight shall be determined in accordance with either test method 5040 or 5041 of Federal Test Method Standard No. 191.

Workmanship. The Impregnated Pads shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Jar (JR). One jar containing 40 pads, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item. Testing and examination shall be conducted to determine compliance with all specification requirements. Test methods shall be suitable, accurate and reproducible.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105 and as specified herein. The unit of product for examination shall be the Impregnated Pads in an immediate container. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5 maximum percent defective.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric Products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.
