COMMERCIAL ITEM DESCRIPTION

LIDDING SHEET, UNIT DOSE

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a lidding sheet suitable for use with a solid and liquid dose packaging system.

Salient characteristics:

The unit dose lidding sheet shall provide for a tamper evident seal on individual doses of solid and liquid medication. The lidding sheets shall be differentiated into solid or liquid lidding and shall be of the following types:

Type 1	18 dose, solid
Type 2	40 dose, solid
Type 3	10 dose, 5ml, 15ml, 30 ml, liquid

The lidding sheet shall be 4 inches (10.2 cm) wide by 9 inches (22.9 cm) long. The sheet shall be heat sealed to the blister package to provide a moisture barrier for the contents. The sheet shall consist of a paper foil layer with a heat seal coating that activates the seal when heat and pressure are applied.

The sheeting shall provide positive sealing of the blister sheet and shall provide a peelable, non-resealable lid for convenient access to the packaged medication at the point of use.

Workmanship. The unit dose lidding sheet shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package, containing 25 unit dose lidding sheets of Type 1, Type 2, or Type 3, as specified, constitutes one unit.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of II. The unit of product for examination purposes shall be one unit dose lidding sheet as specified in this description.

Defects.

Lidding sheet not free of cracks, tears, and ruptures.

Printing, if any, not legible.

Sampling for tests. Sampling for tests including dimensional test, shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and inspection level of S-1. The unit of product for tests purposes shall be one unit dose lidding sheet.

Tests.

Sealing Test. A lidding sheet shall be sealed to an appropriate blister sheet using a suitable power heat sealer. The lidding sheet shall then be checked for a positive seal, easy peeling from the blister sheet, and non-resealability after peeling. Failure of the lidding sheet to achieve a positive seal, to be easily peelable, and to be non-resealable, shall constitute a defect.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

6530-01-166-7770 (Type 1)
6530-01-166-0153 (Type 2)
6530-01-170-0643 (Type 3)

Notes:

The above types of unit dose lidding sheets shall be compatible with the following unit dose blister sheets:

Lidding Sheet	Blister Sheet
Type 1	NSN 6530-01-139-9580
Type 2	NSN 6530-01-139-9581
Type 3	NSN 6530-01-166-8998
Type 3	NSN 6530-01-166-8997
Type 3	NSN 6530-01-139-9578

The unit dose lidding sheets shall be components of the packaging system, unit, solid or liquid (NSN 6530-01-166-7771), to facilitate reordering consumable supplies.

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.

INSTRUCTIONS. In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE. This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
