METRIC

MIL-C-50872C(AR)
AMENDMENT 1
30 July 1991

MILITARY SPECIFICATION

CARTRIDGE, 40MM, HEDP, M433
LOADING, ASSEMBLING AND PACKING

This amendment forms a part of Military Specification MIL-C-50872C(AR), dated 22 July 1981, and is approved for use by the U.S. Army Armament, Munitions and Chemical Command, and is available for use by all Department and Agencies of the Department of Defense.

PAGE 10

4.4.2.5, Delete MAJOR 102 in its entirety and substitute:

"102. Air Pressure 4.5.7 4.5.7 3.2 4.5.7"

PAGE 20

Add new paragraph 4.5.4.1:

"4.5.4.1 Alternate method for Specific Gravity determination.

Prior to assembly, weigh empty body assembly with liner assembly and retainer in air (grams). Record the weight as "A".

Prior to assembly, weigh the same empty body assembly with liner assembly and retainer submerged in water (grams). Record the weight as "B".

Dry the components and load with explosive composition using normal production methods.

Weigh the loaded assembly in air (grams). Record the weight as "C".

Weigh the loaded assembly submerged in water (grams). Record the weight as "D".

Calculate the specific gravity of charge as follows:

$$\text{Sp. Gr.} = \frac{C - A}{(C-A) - (D-B)}$$ "

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

4.5.7, Add:

"Fourteen (14) samples shall be selected from every thirty (30) minutes of production. The last sample shall be air tested. If it is acceptable the thirty (30) minutes of production shall be considered acceptable; and the samples shall be returned to the lot. If the sample is unacceptable, the remaining thirteen (13) samples shall be air tested. If no failure occurs, the thirty (30) minutes of production shall be considered acceptable. If one (1) or more failures occur, the thirty (30) minutes of production shall be rejected and segregated from the lot."
