PERFORMANCE SPECIFICATION SHEET

SWITCHES, PRESSURE, BULKHEAD MOUNTED, AIRCRAFT, APPROXIMATE GAUGE, CLASS 4

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-PRF-8932.

REQUIREMENTS:

1. Dimensions, operating pressure ranges, and tolerances. The dimensions, operating pressure ranges, and tolerances shall be as specified in table I.

2. Pressure switch port designations. Each approximate gauge pressure switch shall have one pressure port as shown on figure 1 of MIL-PRF-8932. The designation letter "P" (see figures 1 and 2) shall be stamped next to the connection port. The switch, which requires a case pressure release (CPR) valve shall be marked with the letters "CPR" permanently and legibly stamped on the switch case directly adjacent to the switch's case pressure valve.

3. Superseding part numbers. The canceled part numbers and the corresponding superseding part numbers are as shown in table II.

4. Intended use. The pressure switches covered by this specification are used in the production and maintenance of F-18 military aircraft. These aircraft are exposed for prolonged periods to extreme seagoing environments not encountered by commercial aircraft.

5. Changes from previous issue. Marginal notations are not used in this revision to identify changes with respect to previous issue due to the extent of the changes.

AMSC N/A FSC 1650

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
