* 4.6.4: Delete entire paragraph and substitute the following:

"4.6.4 Flexibility. The hose shall be closely coiled about a 1 3/4 inch diameter rod and released. This test shall be repeated four times, except that for each successive test, the hose shall be turned 90 degrees about its longitudinal axis and recoiled on the rod. Then the hose shall be mounted in a fixture as shown in Figure 1. With one end of the hose assembly securely clamped in place and the overall hose held by a pillow block loosely secured around the opposite end, flex five times by turning the loosely secured end clockwise through one complete (360 degrees) rotation for hoses under 30 inches in length. For hoses 30 inches or longer, flex the hose five times by turning the loosely secured end clockwise through two complete (720 degrees) rotations. Repeat this procedure five times for the opposite end. The hose shall pass the requirements specified in paragraph 3.5.3."
