				203	412	800
		176	559	203	412	1600
	Cast Iron	176	559	330	412	3200
	Steel	117	711	171	315	1500

*Top plate has a fused aluminum coating.

MATERIAL: Material used in the fabrication of the hot plates shall be durable and of the quality normally used by the manufacturer in his standard commercial items. The electrical wiring shall conform to all the requirements of the Underwriters Laboratory, Code Numbers UL1030 and UL1262.

DESIGN: The hot plates shall have a metal base and tops as specified in the table. The heating element shall be nickel chromium wire that is securely held in place. The controls shall be bi-metallic thermostat operated through bakelite control knobs or handle with graduated reference markings. The power cord shall have three conductors with a grounded three prong plug. All units will operate on nominal 120V/50-60Hz single phase except MS36515-7 which will use 240V/50-60Hz.

NOTE:

1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
2. For design feature purposes, this standard takes precedence over procurement documents referenced herein.
3. Reference documents shall be of the issue in effect on date of invitations for bid.
