MILITARY SPECIFICATION

RESISTOR, VARIABLE, NONWIRE WOUND
(ADJUSTMENT TYPE, SINGLE TURN),
STYLE RJ50

This amendment forms a part of MIL-R-22097/6E, dated 16 February 1972, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 1

* Title, delete and substitute as printed above.

After title, add:

THIS SPECIFICATION INACTIVE FOR DESIGN AFTER 3 November 1982 (SEE 6.2).

PAGE 3

* TABLE I, add the following under Megohms and Volts respectively: "0.20" and "200".

6.2, delete and substitute the following paragraphs:

"6.2 Supersession data. The resistors specified herein are not for use in design after 3 November 1982. They are authorized for use in design contracts effective prior to or on the date of this specification and to support existing military equipment. Resistors specified in MIL-R-39035/4 are preferred for design.

"6.2.1 MIL-R-22097/6A, characteristic B has been deleted. Resistors previously identified under characteristic B shall be substituted by resistors of characteristic C."

The margins of this amendment are marked with an asterisk to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.

CONCLUDING MATERIAL

Custodians:
