FOREWORD

This handbook includes three types of listings designated as Section One, Section Two and Section Three.

Section One lists, in alpha-numerical sequence, DODIC/NALC designated items that have applicable detail documents for Palletizing, Truckloading, Carloading and Container Loading. Descriptions of ammunition as listed in Section One, are as shown in OD 16135 "Navy Ammunition Logistics Codes" and may differ somewhat from titles cited on the detail document sheets.

Section Two lists, in alphabetical order, all items that have applicable detail documents for Palletizing, Truckloading, Carloading and Container Loading. In this section, like items (bombs, cartridges, fuzes, etc.) are listed under a common heading either alphabetically or numerically depending on the item; i.e., ASROC, BULLPUP or TERRIER Missile sublistings are alphabetical, bombs are numerical by weight, cartridges are numerical by size. Instances where a sublisting can be broken logically into both an alphabetical and numerical group, the alphabetical group is listed first.

NOTE

Sections One and Two provides the WR/MIL-STD slash/dash numbers only. It does NOT give current document revision and change notice status. Section Three is used for this information.

Section Three is a numerical index of all published detail documents. Each basic WR/MIL-STD number is presented separately listing their associated detail documents in numerical order by slash/dash number. The current revision/change notice status of the listed documents is given in the "Revision Letter" and "Change Notice" columns. Also included is a "Transaction List to Section Three" informing the user of the detail documents which have been issued, revised, or changed since the previous revised Handbook was published.

Section Three should be used by all holders of these documents to verify that they have up-to-date documentation.

Copies of this handbook and detail documents listed in it may be obtained from the Commanding Officer, Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, Pennsylvania 19120 by completing Specifications and Standards Requisition (DD Form 1425).

Notices of discrepancies and suggested changes should be forwarded to the Commanding Officer, Naval Weapons Station Earle, Code 8053, Naval Weapons Handling Center, Colts Neck, New Jersey 07722.

FOREWORD (Continued)

Documents similar to those listed in this handbook applicable to Army ammunition items may be obtained from the Director, U.S. Army Defense Ammunition Center and School, ATTN: SARAC-DEO, Savanna, Illinois 61074.

Documents similar to those listed in this handbook applicable to Air Force ammunition items are listed in Air Force Instruction to 11A-1-61, "Technical Manual - Storage and Outloading Instructions for Conventional Ammunition." This document may be obtained from the Defense Printing Service, ID Programs Branch, Washington, DC 20350.

This handbook will be updated and revised periodically to include new documents and revisions and changes to existing documentation.

DOCUMENT TITLES
AND
CROSS-REFERENCE DATA

WR-51	Shipping and Handling....MIL-STD-1320 Instructions for Weapons Systems Components in Trucks and Trailers	Truckloading of Ammunition and Explosives
WR-52	Carloading of Weapons....MIL-STD-1325 and Major Weapons Systen Components	Railcar Loading of Hazardous Materials
WR-53	Palletizing Domestic.....MIL-STD-1322 Unit Loads	Unit Loads of Ammunition and Explosives for Domestic and Overseas Shipment
WR-54	Palletizing Fleet Issue..MIL-STD-1323 Unit Loads	Unit Loads of Ammunition and Explosives for Underway Replenishment
WR-55	Palletizing Amphibious...MIL-STD-1324 Unit Loads	Palletizing Amphibious Unit Loads of Weapon Components
WR	(None).....MIL-STD-1386	Loading of Hazardous Materials in MILVAN Containers
WR	(None).....MIL-STD-1663	Loading and Restraint of Ammunition and Explosives in Commercial Intermodal Containers, Utilizing the Internal Restraint Systems Kit

NOTES:

1. All existing Weapons Requirement (WR) detail documents are to be used until each is cancelled by a Change Notice or superseded by a MIL-STD detail document. When a WR detail document requires revision, it will be converted to a MIL-STD detail document which will retain the original WR detail document number but without a revision letter; e.g. WR-54/18A will become MIL-STD-1323-18. A new detail document is assigned only a MIL-STD-identification.
2. MIL-STD-1324 has not been prepared to date.

GENERAL NOTE

The majority of these listings cite both Military Standards (MIL-STD) and Weapon Requirement (WR) numbers with no distinction as to which is in the column heading.

The user can differentiate between the two since all MIL-STDs listed have dash (-) numbers and all WRs have slash (/) numbers.

STATUS OF BASIC
WEAPON REQUIREMENTS AND MILITARY STANDARDS

MIL-STD-1320..... C Revision; no Change Notice
MIL-STD-1325..... A Revision; no Change Notice
