C-B-801H
AMENDMENT-3
April 13, 1977
SUPERSEDING
Amendment-2
January 27, 1976

FEDERAL SPECIFICATION

BUTTER

This amendment, which forms part of Federal Specification C-B-801H, dated September 26, 1974, was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal Agencies.

PAGE 1

1.2.2 (f) Delete "60,".

PAGE 4

Line 4 from top of page, delete "ARS 91-79" and substitute "APHIS 91-1".

Directly below insert the following additional reference: "Uniform Methods and Rules - Bovine Tuberculosis Eradication."

3.1.1, line 3, Insert the following sentence after sentence no. 1, "For Military Agencies, undergrade milk shall not be acceptable."

Sub paragraph (1) after "Area" add "in accordance with the Uniform Methods and Rules - Bovine Tuberculosis Eradication".

Sub paragraph (3), line 2, delete "91-79" and substitute "91-1".

PAGE 5

Add the following paragraph:

"3.1.6 Butter starter cultures. Harmless bacterial cultures, when used in the development of flavor components in butter (see 6.1), shall have a pleasing and desirable taste and odor and shall have the ability to transmit these qualities to the finished product."

3.5, line 7. Delete the period after "MIL-STD-1482" and add "and listed as an approved military source of supply in the Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement."

4.3.6.3 Delete and substitute:

"4.3.6.3 Examination of salt, color and butter starter cultures. Examination shall be made of labels, invoices, plant or laboratory records or other valid documents to determine conformance of those components, as applicable, to the identity requirements in 3.1. Nonconformance shall be cause for rejection of the involved finished product. In addition, butter starter cultures, when used, shall be examined organoleptically (prior to inoculation of cream for ripening), as necessary, to determine compliance with the condition requirements referenced in 3.1. The sample for examination shall be approximately 3 ounces, derived aseptically, from the butter starter cultures prior to use. Cultures which do not conform to the referenced organoleptic properties shall be unacceptable and use of such shall be cause for rejection of the involved finished product."

PAGE 14

4.3.13, line 7. Delete "Net weight exceeds 68 pounds" and substitute: "Net weight exceeds 60 pounds for styles (a) through (d) or 68 pounds for style (f)".

PAGE 15

Add the following paragraph:

"4.3.15 Sampling procedure and acceptance criteria for testing of end item. The finished product shall be tested for the microbiological and analytical characteristics in accordance with the referenced requirements in 3.4. Procedures for testing shall be in accordance with the publication referenced in 3.2. Lot identity shall be maintained in accordance with 4.3.10.1, and the lot shall be expressed in terms of pounds. The sample unit for testing shall be a single 1-pound print or its equivalent in bulk, quarter pound prints or patties. Only one sample unit shall be taken from a shipping container. The sample prepared for testing shall be an approximate 8-ounce composite derived from the number of sample units indicated by inspection level S-2. Aseptic technique shall be used in compositing the sample for analyses, and both surface and subsurface sections of the butter trier plug (or an equivalent amount) shall be included in the composite sample. Analytical data shall be reported to the same decimal place or unit specified for the pertinent requirement. Microbiological counts shall be reported in accordance with the procedures described in the publication referenced in 3.2. Nonconformance to one or more test requirements shall be cause for rejection of the lot."
