C-C-271H
INT. AMENDMENT-1(Army-GL)

January 16, 1974

INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

CHEESE, CHEDDAR, NATURAL

This interim amendment was developed by the U.S. Army Natick Laboratories (GL), Natick, MA 01760, based upon currently available technical information. It is recommended that Federal Agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized Federal Agencies to use this interim amendment as a valid exception to Federal Specification C-C-271H, dated July 17, 1973.

4.4.4.3.2 Delete and substitute:

"4.4.4.3.2 Examination of the net weight shall be in accordance with the following procedure. The sample size shall be one shipping case from each vat lot represented in the inspection lot but, in any event, not less than four shipping cases per inspection lot. The sample unit to be weighed shall be the cheese, including wrappers, contained in the shipping case. The weight of the sample unit, less the tare weight of the wrapper and shipping case, shall be equal to or greater than the marked weight. (Note: In determination of net weight when product is delivered in the intact package, i.e. plastic wrapper or bag, in which cured, such packaging will not be considered part of the tare weight. The net weight shall be reported to the nearest 1/4-pound). If the weight of a sample unit is one ounce or more under the marked weight, the shortage for the applicable vat lot shall be calculated by multiplying the test shortage (converted to decimals), by the number of containers in the vat lot.
