DATA ITEM DESCRIPTION

Title: Cyber Survivability Risk Factors Assessment – Event, Likelihood, Impact (CS-RFA)

Number: DI-NUSU-82555

Approval Date: 20260914

AMSC Number: 10695

Limitation: None

DTIC Applicable: No

GIDEP Applicable: No

Preparing Activity: 27

Project Number: NUSU-2026-003

Applicable Forms: None

Use/Relationship: The CS-RFA provides a characterization of Cyber risk, based on design within, and to the edge of, the weapon system. A risk assessment of the weapon system's susceptibility to known Cyber threats is provided. This data will inform the Cyber Survivability Risk Factor Reduction (CS-RFR) data delivery. Cyber risk is identified in the design against allocated, decomposed, and derived Cyber systems engineering-based requirements. The CS-RFA is not a report of compliance maturity against a list of prescribed security controls.

This data item description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

1**. Format.** The CS-RFA shall be in contractor's format.

2. **Content.** The CS-RFA shall include the following:

a) A characterization of the external attack surface at the edge of the weapon system based on the most recent design.

b) A characterization of the attack surface within the weapon system based on the most recent design.

c) A comprehensive visualization of the external attack surface at the edge of the weapon system based on the most recent design.

d) A comprehensive visualization of the attack surface within the weapon system based on the most recent design.

e) An enumeration of the known cyberspace attacks given the characterized attack surface.

Check the source to verify that this is the current version before use.

f) A visualization of each known cyberspace attack that can penetrate the attack surface illustrating where an adversary can exploit a weakness.

g) A description of the consequences of each known cyberspace attack that is estimated to be successful.

h) Reference: NIST SP 800-30, *Guide for Conducting Risk Assessments* (Copies of this document are available online at https://csrc.nist.gov/pubs/sp/800/30/r1/final).

3. **POC.** Identify Office/Organization responsible for reporting Cyber Survivability Risk Factors Assessment.

4. **Additional Resources Required**
None.
