COMMERCIAL ITEM DESCRIPTION

FOIL, TITANIUM

The General Services Administration has authorized the use of this Commercial Item Description.

Abstract. The commercial item description covers one kind of titanium foil. The foil is intended for use in fabrication of electrical equipment for one submunition system.

Salient characteristics. The chemical composition of the material shall meet the requirements of ASTM B 265, Grade 2. The thickness shall be 0.000100 to 0.000125”; the width shall be not less than 3.25”. The foil shall be cold rolled to reduce the material 85 to 95%. The surface shall be free of the contamination, holes, wrinkles, creases, tears, cracks and seams.

Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producer’s own drawings, specifications, standards, and quality assurance practices. The governments reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Commander, U.S. Army Missile Command, ATTN: AMSMI-RD-SE-TD-ST, Redstone Arsenal, AL 35898-5270.

AMSC N/A FSC 6610

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

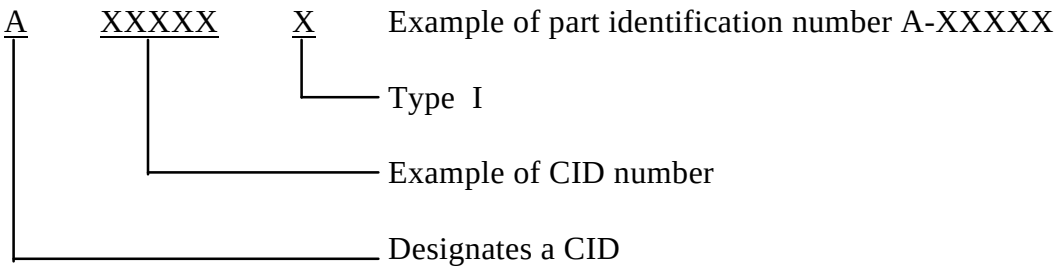
of FED-STD-376, and all other requirements of this Commercial Item Description are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contacting officer has the option of accepting or rejecting the product.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials IAW Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

CID-based part identification number. The following part identification number procedure is for government purposes and does not constitute a requirement for the contractor.



a. Material safety data sheets. Material safety data sheets are required by Title 29 Code of Federal Regulations, Section 1910.1200, and shall be prepared in accordance with the requirements of FED-STD-313. Contracting officers will identify those activities requiring copies of completed material safety data sheets prepared in accordance with FED-STD-313. The pertinent Government mailing addresses for submission of data are listed in FED-STD-313.

b. Source for reference documents. Copies of referenced federal and military specifications and standards may be obtained by sending a request for copies to the Standardization Documents Order Desk, Bldg. 4D, 700 Robbins Ave., Philadelphia, PA 19111-5094:

FED-STD-313	-	Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities
FED-STD-376	-	Preferred Metric Units for General Use by the Federal Government

Copies of referenced ASTMs are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103-1187
