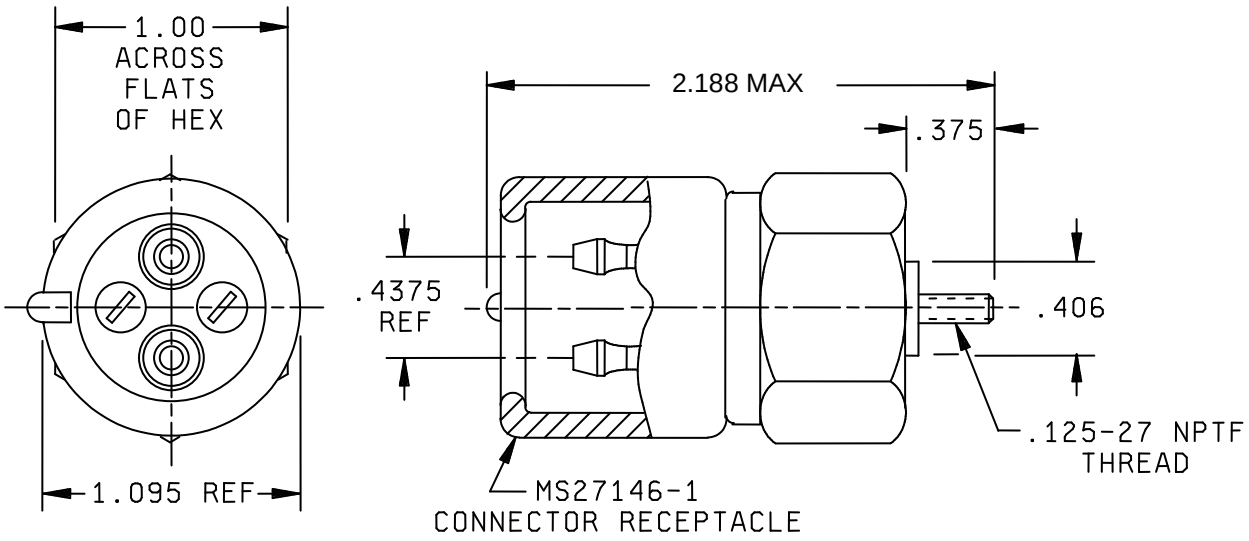
DETAIL SPECIFICATION SHEET

Inactive for new design after 9 June 2005

SWITCH, PRESSURE-STOPLIGHT, VEHICULAR, HYDRAULIC BRAKE SYSTEM, 24 VOLT, WATERPROOF

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The complete requirements for acquiring the switch described herein shall consist of this specification and the latest issue of MIL-DTL-12211.



NOTES:
1. Dimensions are in inches.
2. Unless otherwise specified, tolerances are ±1/32 on fractions.
3. For design feature purposes, this standard takes precedence over procurement document referenced herein.
4. Referenced documents shall be of the issue in effect on the date of invitation for bid.
5. This standard is not intended to limit construction to features other than as shown by dimensions, notations or referenced documents.

REQUIREMENTS

Type II (sufficiently high pressure closes contacts) grade A (waterproof) class 2 (low vibration) of procurement specification.

Switch contacts shall close from 40 to 110 PSI (actuating pressure) and remain closed upon increasing pressure.

Switch contact rating at 24 volts DC: resistive load 3 Amps.

Switch shall meet overload pressure requirements of procurement specification except applied pressure shall be 1800 PSI for 30 seconds. Switch shall not disintegrate under 2500 PSI

Referenced documents
MIL-DTL-12211

Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extent of the changes.
