MILITARY SPECIFICATION

COUPLER, ANTENNA, AN/SRA-33, FOUR-CHANNEL, AUTOMATICALLY TUNED

This amendment forms a part of Military Specification MIL-C-24219A(EC) dated 8 May 1970

PAGE 1

2.1, SPECIFICATIONS, MILITARY: Delete "MIL-S-901 - Shock Tests, H. I. (HIGH-IMPACT), Shipboard Machinery, Equipment and Systems, Requirements for " and "MIL-Q-9858 - Quality Program Requirements".

2.1, STANDARDS, MILITARY, after "MIL-STD-461": Add "MIL-STD-462 - Electromagnetic Interference Characteristics, Measurement of".

2.1, STANDARDS, MILITARY: Delete "MIL-STD-785 - Reliability Program for Systems and Equipment Development and Production".

2.1, HANDBOOKS, MILITARY: Delete entire entry.

PAGE 2

3.1: Delete and substitute " Interchangeability. Mechanical and electrical interchangeability shall exist between assemblies, subassemblies, and replaceable parts performing the same functions in other equipments of the same production type regardless of the manufacturer or supplier. Interchangeability for the purpose of this paragraph does not mean identity, but requires that a substitution of such like assemblies, subassemblies, and replaceable parts be easily effected, without resorting to selections, in accordance with the following requirements.

"(a) No physical or electrical modification to any parts of the substituted items or the residual equipment shall be necessary.

"(b) Realignment of the electrical circuit in the substituted assemblies of the residual equipment shall not be necessary.

"(c) The substitution shall have no deleterious effect on the equipment's performance capability.

"3.1.1 Operational compatibility. The AN/SRA-33 shall be fully compatible in operation with the AN/SRC-20A and AN/SRC-21A transceivers. Full compatible operation with the V-6 and V-7 versions of the AN/WSC-3(V) transceiver is also required except for the tuning increments."

3.3.1.1, line 1: Delete "class" and substitute "range".

PAGE 3

3.4.4, line 4: Delete " 01 (T)" and substitute "CE01 (BB)".

PAGE 6

3.4.39.2, 3.4.39.3, 3.4.39.4, 3.4.39.5, 3.4.39.6, and 3.4.39.7: Delete.

4.1.1: Delete.

PAGE 7

4.1.3: Delete.

4.2 (b): Add "(6) Electromagnetic compatibility (see 4.4.7)".

PAGE 8

4.3.1: Delete.

PAGE 9

4.4.3, fourth sentence: Delete.

PAGE 10

TABLE IV, (i) Heat test: Delete entry.

4.4.3.3 and 4.4.3.4: Delete.

4.4.4, second sentence: Delete.

TABLE V: Delete "Shock 3.3.1.3.1" and substitute "Interchangeability 3.1".

PAGE 11

4.4.5.1, line 3: Insert "three" between "first" and "production".

4.4.5.1, last sentence: Delete.

4.4.5.2, 4.4.5.3, and 4.4.5.7: Delete.

4.4.5.4, line 2: Delete "and 4.4.5.2".

Add new paragraphs 4.4.7 and 4.4.8:

"4.4.7 Electromagnetic compatibility. The requirements of 3.4.4 shall be verified by tests performed in accordance with MIL-STD-462 on a unit from the first month's production quantity. Any corrections to the equipment required as a result of these tests shall be performed prior to shipment of the production units.

"4.4.8 Interchangeability. Replaceable parts, subassemblies, and assemblies shall be subjected to examination and test to verify complete interchangeability. The manufactured part, subassembly, or assembly shall be mechanically substituted in the Government-furnished equipment (GFE) and an examination or test performed. These items shall be substituted one at a time within an equipment. The contractor shall select tests and examinations from the production inspection to verify the interchangeability. Tests and examinations shall be selected on the basis of being meaningful to the particular item being interchanged. Where electrical or mechanical criteria are not specified in the specification, the contractor shall provide the criteria in sufficient detail to verify the electrical and mechanical aspects of interchangeability. The test shall be performed only once. All incompatibilities will be submitted as an engineering change proposal (ECP), and if approved will be retrofitted on all units."
