COMMERCIAL ITEM DESCRIPTION

FOOD BLENDER, ELECTRIC

The General Services Administration has authorized the use of this commercial item description in preference to size 2 of OO-F-545.

1. SALIENT CHARACTERISTICS

1.1 Design and construction. The blender shall be provided with a 1-gallon capacity container and cover. The container, cover, and blending assembly, which consists of blade and shaft, shall be fabricated from stainless steel. The cover shall be made with a removable plug located in its center. The plug shall be made from an FDA approved plastic or rubber material and be properly sealed to prevent leakage during operation of the blender. The base shall consist of a metal housing with an enamel finish. Control(s) shall be located on the housing to provide for an "OFF" and a "HIGH" position, as well as two intermediate speeds. All control positions shall be clearly marked.

1.2 Motor. The blender shall be powered by a commercial, heavy duty, self-lubricating motor suitable for the required functions and the container size provided.

1.2.1 Electrical. The blender shall be designed to operate on a 120 volt, 60 hertz, single phase power source. The unit shall not exhibit undue vibration, heating or noise when operated in accordance with the manufacturer's instructions. The blender shall have permanently attached to it, a 6-foot, 3-conductor power supply cord with a NEMA 5-15P plug.

1.3 Standards compliance. The blender shall comply with the requirements of UL Standard No. 763 and NSF Standard No. 8. In addition to the identification marking required by UL, the contract number, national stock number, and date of manufacture also shall be included.

1.4 Data name plate (Government unique requirement see 4.4). The blender shall be furnished with a data name plate in accordance with the applicable requirements of MIL-STD-130 except the requirements for: (a) Methods of applying, (b) Identification tags, (c) Information not required, and (d) Optional marking information shall not apply. The data name plate shall be made of minimum 20-gauge corrosion-resisting metal and attached to the blender by rivets, screws, or welding in such a manner as to meet the applicable National Sanitation Foundation (NSF) sanitary requirements for this equipment. The plate shall contain the following information which shall be stamped, engraved, or applied by photosensitive means:

FSC 7320

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

National Stock Number
Procurement Instrument Identification Number
Specification Data
Manufacturer's Name, Address, and Telephone Number
Supplier's Name, Address, and Telephone Number (List only if different from Manufacturer)
Manufacturer's Model Number
Government Approved Manual Number (see 4.2)

Each plate shall be placed so that it is readily visible to the operator during normal operating use and so as to not adversely affect the life and utility of the blender.

2. QUALITY ASSURANCE

2.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, complies with the referenced industry standards, and is the same as the product offered for sale in the commercial marketplace, except for those additional requirements/characteristics specified herein. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under provisions of the contract.

3. PACKAGING

3.1 Packaging and packing. Packaging and packing shall be commercial or expor as specified (see 4.2).

3.2 Commercial. Each blender shall be cleaned, preserved, packaged, packed, and unitized in accordance with ASTM D 3951.

3.3 Export packaging. Each blender shall be disassembled to the extent determined by the contractor to protect parts susceptible to damage during shipment and storage. Each blender shall be packaged in a fiberboard box conforming to type CF or SF, class domestic, style optional of PPP-B-636.

3.3.1 Export packing. Four blenders shall be packed in a wood-cleated plywoo box conforming to type domestic, style optional of PPP-B-601 or a wood-cleated

of MIL-L-10547. Each box shall be closed and reinforced in accordance with PPP-B-601 or PPP-B-591, as applicable.

3.3.2 Palletization. When specified, shipping containers shall be palletized in accordance with MIL-STD-147 (see 4.2).

3.4 Marking (commercial and export). Marking of unit packs, shipping containers, and unit loads shall be in accordance with MIL-STD-129 or ASTM D 3951, as applicable.
