COMMERCIAL ITEM DESCRIPTION

TRUCKS, HAND, 3 SHELVES STAINLESS STEEL UTILITY

The General Services Ministration has authorized the use of this commercial item description in preference to type I of MIL-T-16549.

1. CLASSIFICATION

1.1 Classification. This commercial item description covers hand trucks of the following sizes as specified (see 5.2). Dimensions specified are in inches and do not include handles or bumpers:

Size 1 - 38 long by 23 wide by 36 high
Size 2 - 57 long by 24 wide by 43 high
Size 3 - 31 long by 20 wide by 34 high

2. SALIENT CHARACTERISTICS

2.1 Design and construction. 'Trucks shall be of the size specified. Dimensions and capacities shall be as specified in Table I. Trucks shall be similar to figure 1, which is for illustrative purposes only and is not intended to preclude procurement of trucks otherwise meeting all of the requirements of this document. All trucks shall have 3 shelves, bumper(s), a handle and 4 removable casters. The truck shall be capable of holding 200 percent of its rated load capacity, uniformly distributed over the 3 shelves, for a period of 10 minutes, without weld failure, parts separation, metal tearing, breakage, or noticeable deformation. In addition, the truck, uniformly loaded to 150 percent of its rated capacity, shall be capable of being rolled onto a surface 2 inches below the original surface at the rate of 2 miles per hour without any of the deficiencies noted above.

FSC 3920

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

1/ Overall dimensions for trucks do not include bumpers and handles.

2/ Shelf spacing is defined as the distance between the top surface of one shelf to the bottom surface of the shelf above.

2.2 Materials and components. The truck shall be fabricated from 300 series stainless steel. Threaded fasteners shall be stainless steel, nickel plated carbon steel or chromium plated carbon steel.

2.2.1 Casters. Casters for size 1 and 2 trucks shall ,be 8 inches in diameter. Casters for size 3 trucks shall be 5 inches in diameter. The front casters for sizes 1 and 2 trucks shall be rigid and rear casters (near the handle) shall be swivel. Size 3 trucks shall have all swivel casters. All wheel treads shall be made from a vinyl or rubber-like materials that will provide quiet operation on hard surfaces.

2.2.2 Handle. Trucks shall have a handle welded -to the frame at one. end as shown in figure 1. The clearance between the handle and the frame shall be a minimum of 3 inches. The handle shall be equipped with a bumper(s).

2.2.3 Bumpers-. Truck frames shall be equipped with bumpers to protect walls from impact in any direction. Bumpers shall be capable of being replaced and shall be made from a resilient, nonmarking material.

2.3.4 Codes and Standards, The hand trucks shall conform to the reguirements of National Sanitation Foundation Standard No. 2.

2.4 Data-name plates (Government unique requirement see. 5.4.). The trucks shall be furnished with a data name plate in accordance with the applicable requirements of MIL-STD)-130 except the requirements for: (a) Methods of applying, (b) Identification tags, (c) Information not required and (d) Optional marking information shall not apply. The data plates shall be made of minimum 20 gauge corrosion-resisting, metal and attached to the trucks by rivets, screws or welding in such a manner as to meet the applicable National Sanitation Foundation sanitary requirements, for this equipment. The plate shall contain the following information which shall be stamped, engraved or applied by photosensitive means:

National Stock Number
Procurement Instrument Identification Number
Specification Data
Manufacturer's Name, Address and Telephone Number
Supplier's Name, Address and Telephone Number (list only if different from Manufacturer)
Manufacturer's Model Number
Government Approved Manual Number (see 5.2)

Each plate shall be placed so that is readily visible to the operator during normal operating use and so as to not adversely affect the life and utility of the item.

2.5 Workmanship. The finished trucks shall be clean and free of scratches dents, wrinkles, fabrication marks, breaks, cracks, punctures, sharp edges, sharp corners, burrs, slivers and deformities. Welds shall be ground to blend with adjacent surfaces and shall be free of pinholes, burnholes, cracks, incomplete fusion, pits and flashes. All fasteners shall be drawn tight and shall be free of crossed or stripped threads.

3. QUALITY ASSURANCE

3.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. The Govern-men-t reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4. PACKAGING

4.1 Commercial packaging and packing. Each item shall be cleaned, preserved, packaged, packed and utilized in accordance with ASTM D 3951.

4.2 Export packaging. Each truck shall be cleaned, preserved, and cushioned to protect against corrosion, deterioration and physical damage during shipping and storage. Assembly hardware and casters shall be packaged in a fiberboard box conforming to style optional, type CF or SF, class domestic of PPP-B-636.

4.3 Export packing. Each truck with its parts package shall be packed in a cleated-plywood box conforming to overseas type, style optional of PPP-B-601. The truck shall be blocked, braced, or anchored to prevent movement or damage while in transit. Each box shall be closed and strapped in accordance with the appendix of PPP-B-601. When specified (see 5.2), shipping containers shall be palletized in accordance with MIL-STD-147.

4.4 Labeling (commercial and export}. Commercial labeling shall be acceptable.

4.5 Marking (commercial and export). Marking of shipping container and unit load shall be in accordance with MIL-STD-129.

5. NOTES

5.1 Intended use. The trucks are intended for use in kitchens, galleys, dining rooms, and hospitals for transporting food, kitchen supplies, dishes, medical and laboratory supplies, and linen.

Check the source to verify that this is the current version before use.

5.2 Ordering data. Acquisition documents should specify the following:

a. Title, number, and date of this document.
b. Size truck required (see 1.1)
c. Government approved manual number (see 2.4)
d. When palletization is required (see 4.3).

5.3 Sources of information for nongovernment association documents.

NSF Standard No. 2 - National Sanitation Foundation, 3475 Plymouth Road, P.O. Box 1468, Ann Arbor, Michigan 48106.

ASTM D 3951 - American Society for Testing and Materials, 1916 Race Streets, Philadelphia, PA 19103.

5.4 Government unique requirement. Whenever "(Government unique requirements)" is included in the title of a paragraph under “salient characteristic" it is meant that the requirement is something that is not normally offered to the commercial marketplace by the manufacturer.
