COMMERCIAL ITEM DESCRIPTION

CART, DOUBLE DECK, MESH TOP

The General Services Administration has authorized the use of this commercial item description.

1. Intended use. This commercial item description covers a double deck cart used for transporting produce and stocking store items.

2. SALIENT CHARACTERISTICS

2.1 Design and construction. The cart shall be constructed of nickel-chrome plated steel. The cart shall have a double deck, push handle, and 1000-pound capacity. The cart shall be equipped with four 5-inch minimum diameter wheels with permanently sealed bearings and rubber tires, two swivel in front and two rigid in rear. The cart frame and lower deck shall be constructed of welded, square steel tube, 16 gauge minimum and 7/8 to 1-inch outside measurement. The top deck shall be constructed of either heavy duty steel wire or expanded metal mesh work. The approximate clearance between the upper and lower decks shall be 20 inches.

2.2 Dimensions. The approximate dimensions of the cart including handle shall be 45 inches long by 21 inches wide by 39 inches high. The approximate height of the top deck to the floor shall be 30 inches and the approximate length of the top deck without handle shall be 36 inches.

3. QUALITY ASSURANCE

3.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under provisions of the contract.

4. PACKAGING

4.1 Packaging. The double deck cart shall be packaged, packed, and marked in accordance with the domestic or overseas requirements of ASTM D 3951, as applicable.

FSC 3920

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
