3.5.1: Delete and substitute the following:

"3.5.1 Frequency response. (see 4.5.2) The frequency response at ground level shall be within the limits specified in the frequency response range (see 3.1). The frequency response at simulated altitude, when specified (see 3.1), shall be performed for Qualification and in Group C only and shall be within the limits specified in the frequency response range."

PAGE 5

3.5.15: Delete and substitute the following:

"3.5.15 Salt fog (corrosion). (see 4.5.16) The product shall resist degradation in performance due to salt-fog, and shall meet the specified frequency response envelop (FRE) (see 3.5.1), as specified (see 3.1), sensitivity (see 3.5.2) and dielectric withstanding voltage (see 3.5.5) requirements."

6.1: Delete and substitute:

“6.1: Intended use. These earphone elements are the moving coil type, which are a component of various headband and helmet type headsets and where applicable, telephone handsets. They provide communication for both ground level and altitude applications as specified (see 3.1). These parts have been approved by the Air Force Material Command, Human Effectiveness Directorate, Air Force Research Laboratory, Aural Displays & Bioacoustics (AFRL/HECB), Wright-Patterson AFB, OH, as meeting United States Air Force safety and hearing-protective standards for such equipment.
