AMENDMENT
TO
INTERIM FEDERAL SPECIFICATION

PADLOCK, KEY OPERATED
(RESISTANT TO OPENING BY FORCE, PICK, AND BYPASS TECHNIQUES)

This amendment was developed by the Federal Supply Service, General Services Administration, Washington, D. C. 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this amendment as a valid exception to Interim Federal Specification FF-P-001480(GSA-FSS), dated February 12, 1971.

PAGE 3

Paragraph 3.10 - Delete text and substitute "Padlocks with keys offered under a contract or order shall bear the following identification markings: The specification symbol 'FF-P-001480', the letters 'US', and the manufacturer's name or trademark. The markings shall be permanently and legibly stamped, rolled, or cast on an exterior surface of the padlock case. The set of keys furnished with the padlock shall be similarly marked with an individual serial number in characters not less than 3/32-inch in size. Serial numbers shall not disclose the key bitting either directly or by coding."

PAGE 4

Table I, defect column - Delete 15th line from bottom of page and substitute "Key can be removed from the keyway when the padlock cylinder is in the open position".
