2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless a specific issue is identified, the issue in effect on date of invitation for bids or request for proposal shall apply.

National Motor Freight Traffic Association, Ind., Agent:

National Motor Freight Classification.

(Application for copies should be addressed to the American Trucking Associations, Inc., Tariff Order Section, 1616 P Street, N.W., Washington, DC 20036.)

Uniform Classification Committee, Agent:

Uniform Freight Classification.

(Application for copies should be addressed to the Uniform Classification Committee, Room 1106, 222 South Riverside Plaza, Chicago, IL 60606.)

Joint Committee on Printing (JCP) Publication:

Government Paper Specifications Standards.

(Application for copies should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.)

3. REQUIREMENTS

3.1 Material. Tag board shall be made from such materials and by such processes as to insure compliance with requirements of this specification

3.1.1 Type I, jute tag board. Type I shall meet the requirements of the Government Paper Specification Standards JCP-P30.

3.1.2 Type II, manila tag board. Type II shall meet the requirements of the Government Paper Specification Standards JCP-P10.

3.2 Sizes. Sheets of tag board shall be furnished in size ordered (see 6.2). Size and trim tolerance shall conform to the requirements of the Government Paper Specification Standards.

3.3 Grain. Grain direction on flat sheets shall be as specified (see 6.2).

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplier and services conform to prescribed requirements.

4.1.1 Inspection. Sampling for inspection shall be performed in accordance with MIL-STD-105, except where otherwise indicated.

4.1.2 Inspection of components and materials. In accordance with 4.1 above, the supplier is responsible for insuring that components and materials used were manufactured, examined, and tested in accordance with this specification or referenced subsidiary specifications and standards.

4.2 Inspection of the end item.

4.2.1 Sampling. Samples of shipping containers, packages (ream) and sheets shall be examined for defects set forth in the applicable subparagraphs. The inspection levels and acceptable quality levels (AQLs) shall be as indicated. For sampling purpose, the lot shall consist of all the tag board of one type and size presented for inspection at one time.

4.2.1.1 Examination for preparation for delivery. An examination of the packaging, packing, marking and palletization or unit loads shall be made in accordance with the quality assurance provisions of PPP-P-25.

4.2.1.2 Examination of end item. The lot size for this examination shall be expressed in sheets of tag board. The sample unit shall be one sheet. The inspection level shall be S-3 and the AQL shall be 2.5.

Examine	Defect
Color and finish	Color and finish do not compare favorably to standard sample.
	Color variation from package to package in delivery.
	Finish variation among sheets within package.
Dimension and trim	Not size specified within tolerance.
	Not square within tolerance.
Writing quality	Not suitable for writing on with pen.
	Pen skips.
	Letters feather.
Workmanship	Sheet not favorably comparable to standard sample with respect to shives; dirt specks; knots; oil, dye, or slime spots; slimeholes, blows or blisters; half sheet; broken, crushed, torn, uneven, ragged edges.
	Welts, wrinkles, creases, checks.

4.3 Testing of the end item. The end item shall be tested for the applicable characteristics as specified in section 3 for each lot presented for examination for each type, weight, size, or color of paper. The characteristics tested and methods of testing shall be as specified in the Government Paper Specification Standards. The lot size shall be expressed in units of shipping containers and the inspection level for determining the sample size shall be S-2. The sample unit shall consist of not less than 3000 square inches of paper and not more than one sample unit shall be taken from any one ream. The test report shall include all values upon which the results are based and there shall be no failure to meet the lot average, sample unit, or composite average.

5. PREPARATION FOR DELIVERY

5.1 Packaging, Packing, Marking and Palletization or Unit Load; Level A, B, and C. Unless otherwise specified, tag board of the type and size specified shall be prepared for delivery in accordance with the applicable levels of protection, appropriate marking and palletization or unit loads of PPP-P-25.

6. NOTES

6.1 Intended use. The intended use for each type of tag board shall be as specified in the Government Paper Specification Standards for the applicable type.

6.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(a) Title, number, and date of this specification.
(b) Type of tag board (see 1.2).
(c) Size (see 3.2).
(d) Grain (see 3.2).
(e) Pressroom conditions (see 6.3).
(f) Level of packaging and packing (see 5.1).
(g) Marking requirements (see 5.1).
(h) Palletization or unit load requirements (see 5.1).

6.3 Pressroom conditions. When board will be used in air-conditioned pressrooms, the level of temperature and relative humidity maintained shall be stated in the invitation of bid (see 6.2).

6.4 This specification consolidated UU-T-75 and UU-T-78. Type I of this specification was covered under UU-T-75, and type II was covered under UU-T-78. Upon publication of UU-T-1366, UU-T-75 and UU-T-78 are cancelled.
