FEDERAL SPECIFICATION

WRAPPER, STENCIL FILING

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers both absorbent and non-absorbent stencil wrappers for filing used mimeograph stencils.

1.2 Classification. The stencil wrappers shall be of the following types as specified (see 6.2):

Type I - Absorbent.
Type II - Non-absorbent (oiled paper).

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein.

Federal Specification:

PPP-B-636 - Boxes, Shipping, Fiberboard.

Federal Standard:

Fed. Std. No. 123 - Marking for Domestic Shipment (Civil Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(Single copies of this specification and other Federal Specifications required by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers at the General Services Administration Regional Offices in Boston, New York, Washington, DC, Atlanta, Chicago, Kansas City, MO, Fort Worth, Denver, San Francisco, Los Angeles, and Seattle, WA.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless a specific issue is identified, the issue in effect on date of invitation for bids or request for proposal shall apply.

National Motor Freight Traffic Association, Inc., Agent:

National Motor Freight Classification.

(Application for copies should be addressed to the American Trucking Associations, Inc., Tariff Order Section, 1616 P Street, N.W., Washington, DC 20036.)

Uniform Classification Committee, Agent:

Uniform Freight Classification.

(Application for copies should be addressed to the Uniform Classification Committee, Room 1106, 222 South Riverside Plaza, Chicago, IL 60606.)

Technical Association of the Pulp and Paper Industry (TAPPI) Standards:

T 402 - Standard Conditioning and Testing Atmospheres for Paper, Board, Pulp Handsheets and Related Products.
T 405 - Wax in Paper.
T 410 - Weight per Unit Area (Basis Weight or Substance) of Paper and Paperboard.
T 411 - Thickness (Caliper) of Paper and Paperboard.
T 462 - Printing-Ink Receptivity of Paper (Castor-Oil Test).

(Application for copies should be addressed to the Technical Association of the Pulp and Paper Industry, One Dunwoody Park, Atlanta, GA 30341.)

(Technical society and technical association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.)

3. REQUIREMENTS

3.1 Material. Stencil wrappers shall be made from fibrous, cellulosic material which may include reclaimed fibers and shall conform to the requirements of table I when tested as specified in 4.3.2.

TABLE I. Physical requirements

Characteristic	Type I	Type II
Basis weight (24 x 36 - 500)	75.0 ± 3.0 pounds	88.0 ± 4.0 pounds
Thickness	0.0065 ± 0.0015 inch	0.0053 ± 0.0003 inch
Oil or wax content		8.0 ± 1.0 percent
Oil penetration, not to exceed		50 seconds (sec).

3/2 Dimensions. The paper in accordance with 3.1 shall be foled once in the long direction so that both halves shall measure 9 ± 1/4 inches in width and 19 ± 1/4 inches in length to form a stencil wrapper.

3.3 Workmanship. The stencil wrappers shall be free of holes, tears, and wrinkles. Edges shall be square cut and not ragged. The folded edge shall be parallel to the long, cut edge.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Check the source to verify that this is the current version before use.

4.1.1 Sampling for inspection. Sampling for inspection shall be performed in accordance with MIL-STD-105, except where otherwise indicated. For sampling purposes a lot shall consist of all stencil wrappers of the same type offered for delivery at one time.

4.2 Component and material inspection. In accordance with 4.1 above the supplier is responsible for insuring that materials and components used were manufactured and inspected in accordance with the requirements of this specification or referenced subsidiary specifications to the extent specified.

4.3 Inspection of the end item.

4.3.1 Examination of the end item. Examination of the end item shall be made for the defects set forth in the applicable subparagraphs at the inspection levels and acceptable quality levels (AQL's) set forth therein.

4.3.1.1 Examination of preparation for delivery. An examination shall be made to determine that markings, materials, workmanship, and contents comply with the requirements of section 5. The lot size shall be expressed in units of shipping containers. The inspection level shall be S-2 and the AQL shall be 2.5 expressed as percent defective. The sample unit shall be one shipping container, fully packed and sealed. Defects shall be as listed below.

Examine	Defects
Marking (exterior and interior)	Incorrect; incomplete; illegible; omitted; of improper size, location, sequence or method of application.
Material	Any nonconforming component; components missing, damaged or otherwise defective.
Workmanship	Inadequate application of components, such as incomplete closure of container flaps, loose or inadequate sealing, strapping, or stapling.
	Bulged or distorted container.
Contents	Number of packages per shipping container more or less then specified.

4.3.1.1.1 Examination of the intermediate package. An examination shall be made for defects set forth below. The lot size shall be expressed in units of cartons comprising the inspection lot. The sample unit shall be one carton. The inspection level shall be S-3 and the AQL 2.5, expressed as percent defective. The cartons comprising the sample shall be selected at random from the shipping containers selected in 4.3.1.1. Defects shall be as listed below.

Examine	Defect
Packaging	Not as specified.
Wrappers	Not type specified.

4.3.1.1.2 Examination of the item for count. Two packages shall be selected at random from each of the shipping containers selected in 4.3.1.1. The lot shall be unacceptable if the average count of stencil wrappers per package, of all packages examined, is less than specified.

4.3.1.2 Examination of the end item for visual defects. Examine 100 stencil wrappers for the defects shown below. The 100 stencil wrappers shall be accumulated by selecting an approximate equal number of stencil wrappers from each of the packages selected in accordance with 4.3.1.1.1, except that not more than 10 stencil wrappers shall be taken from any one package. The lot shall be unacceptable if more than two of the 100 stencil wrappers examined contain one or more of the defects listed below.

Check the source to verify that this is the current version before use.

Examine	Defect
Appearance	Any uneven or ragged edges. Any holes, tears, or wrinkles.
Dimensions	Length and width not as specified within tolerance limits.

4.3.2 Testing of the end item. Each lot of stencil wrappers of one type shall be tested for the characteristics in table II. The sample unit shall be five stencil wrappers randomly drawn from a package. No more than one sample unit shall be drawn from any one package. Five sample units shall be tested. The average value for each characteristic shall meet the requirements specified. All samples shall be conditioned and tested in accordance with the provisions of TAPPI T 402.

TABLE II. Instructions for testing

Characteristic	Specification reference: Requirement	Specification reference: Test method	Rqmt. applied to: Sample unit	Rqmt. applied to: Lot average	Number of determinations per sample unit	Results reported as: Pass or fail	Results reported as: Numerically to nearest
Atmospheric conditions	4.3.2	T 402	All testing				
Basis weight	Table I	T 410		X	2		0.1 pound
Thickness	Table I	T 411		X	10		0.0001 inch
Oil content	Table I	T 405		X	1		1 percent
Oil penetration	Table I	T 462		X	1		1 sec.

5. PREPARATION FOR DELIVERY

5.1 Packaging. Packaging shall be level B or C, as specified (see 6.2).

5.1.1 Level B. One hundred stencil wrappers of one type shall be packaged in a box; or wrapped in paper and secured with tape or an adhesive; or wrapped in plastic film secured or sealed.

5.1.2 Level C. Stencil wrappers shall be packaged to afford adequate protection against damage during shipment from the supply source to the first receiving agency.

5.2 Packing. Packing shall be level A, B, or C as specified (see 6.2).

5.2.1 Level A. Ten unit packages, of one type, shall be packed in a box conforming to PPP-B-636, class weather resistant.

5.2.2 Level B. Ten unit packages, of one type, shall be packed in a box conforming to PPP-B-636, class domestic.

5.2.3 Level C. Stencil wrappers in quantities as specified (see 6.2) packaged as specified in 5.1 shall be packed in containers to assure carrier acceptance and safe arrival at destination in compliance with Uniform Freight or National Motor Freight Classification, as applicable.

5.3 Marking. In addition to any special markings required in the procurement documents, marking of the interior packages and exterior shipping container shall be in accordance with Fed. Std. No. 123 for civil agencies or MIL-STD-129 for military agencies, as applicable (see 6.2).

6. NOTES

6.1 Intended use. Stencil wrappers are used to file mimeograph stencils after use. Type I stencil wrappers can be used before cleaning the stencil, and Type II stencil wrappers should be used after cleaning the stencil.

6.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(a) Title, number, and date of this specification.
(b) Type required (see 1.2).
(c) Applicable levels of packaging and packing (see 5.1 and 5.2).
(d) Marking document required (see 5.3).
(e) Quantities required (see 5.2.3).
