COMMERCIAL ITEM DESCRIPTION

CHALK, MARKING, WHITE (MOLDED)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification SS-C-266.

This commercial item description covers the requirements for molded white marking chalk with a plain or enameled finish.

Salient characteristics:

The chalk shall produce distinct, uniform, and erasable markings when used for writing on commercial chalkboards.

The chalk shall be a minimum of 3-1/8 inches in length. It shall be either a cylinder with a nominal diameter of at least 3/8 inch or a tapered rod with a nominal diameter of at least 7/16 inch at one end and at least 3/8 inch at the other end. The nominal diameters of the chalk shall have a permissable tolerance of ± 1/16 inch.

The chalk shall have a minimum breaking strength of 2 lb.

A recognized seal shall be marked on the packaging certifying that the chalk does not contain toxic materials in quantities sufficient to be harmful to the user as a result of any reasonably foreseeable handling or use, including ingestion.

Workmanship. The chalk shall have a smooth, uniform surface with a soft, velvety texture and shall be composed of material that is free from any defects that may affect its performance or use.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The chalk shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
