COMMERCIAL ITEM DESCRIPTION

NUMBERING AND LETTERING STAMP

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification ZZ-R-800.

Salient characteristics:

Each stamp shall consist of from 2 to 10 endless, rubberized fabric bands mounted on a metal or plastic frame. Each band shall rotate readily and independently on cogged drums by means of a serrated thumbwheel, and shall not slip out of place when in use. The procurement documents shall specify the number of bands and the legends on each band.

Legend characters shall be raised in relief by a minimum of 1/32 inch from a 1/16-inch (minimum) thick base and vulcanized onto the bands. The printed height of the characters shall be specified in the procurement documents as one of the following:

Commercial size Number 0	-	7/64 inch
Commercial size Number 1	-	8/64 inch
Commercial size Number 1-1/2	-	9/64 inch
Commercial size Number 2	-	11/64 inch

Each stamp shall produce clear, distinct, sharp, single impressions of equal intensity, with no closing of characters. The synthetic and/or natural rubbers used shall be of sufficient hardness and durability to ensure usability over the entire 5-year lifetime of the stamp.

The front of the stamp shall be readily identified.

Metal components shall be coated or treated to prevent corrosion.

Workmanship. The frame and handle shall have a smooth finish to prevent injury to the user.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The stamps shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping containers shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
