COMMERCIAL ITEM DESCRIPTION

PENCIL, LEAD DRAWING

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers black lead drawing pencils used by artists, draftsmen, and designers.

Salient characteristics:

Pencils shall be wood-cased with graphite lead or plastic-based lead as specified, and of the degree of hardness specified.

Lead shall be centered within the casing and securely bonded (glued) to the casing throughout its entire length. Lead shall be continuously smooth marking, provide clearly visible lines, not crumble or dust and be easily erasable with suitable rubber, art gum or plastic erasers.

The wood casing shall be straight and the two halves securely bonded (glued) throughout the entire length of the pencil.

When sharpened the wood casing shall not split, splinter or tear, shall present a smooth finish, and the lead shall not crumble or break.

Pencils without erasers shall be not less than 6-7/8 inches long and with erasers not less than 7 inches long.

Pencils shall be finished in accordance with normal commercial practice and shall be marked with the manufacturer's name or trademark an lead hardness designation.

Workmanship. Pencils shall be from splits, splinter, blisters and any other imperfections which affect the appearance or might impair usage.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

Note. Purchasers shall specify lead hardness desired and whether with or without erasers.

The term "lead" is used to denote the marking medium.
