"TABLE VII. Group B inspection.

Test 1/	Requirement paragraph	Method paragraph	Number of samples
Resistance-temperature characteristic	3.17	4.6.12	4.5.1.4.1
Seal (as applicable)	3.8	4.6.3	4.5.1.4.1

1/ If the manufacturer can demonstrate that this test has been performed five consecutive times with zero failures, the frequency of this test(s), with the approval of the qualifying activity, can be performed on an annual basis. If the design, material, construction, or processing of the part is changed, or if there are any quality problems or failures, the qualifying activity may require resumption of the original test frequency."

4.5.1.4.1, delete and substitute:

"4.5.1.4.1 Sampling plan. A sample of 13 parts shall be randomly selected, if one or more defects are found, the lot shall be rescreened and defects removed. After screening and removal of defects, a new sample of 13 parts shall be randomly selected, if one or more defects are found in the second sample, the lot shall be rejected and shall not be supplied to this specification."

1/ If the manufacturer can demonstrate that these tests have been performed five consecutive times with zero failures, these tests, with the approval of the qualifying activity, can be deleted. The manufacturer, however, shall perform these test every 3 years after the deletion as part of long term verification. If the design, material, construction, or processing of the part is changed, or if there are any quality problems, the qualifying activity may require resumption of the specified testing.
