MIL-T-82300/28(TD)
22 June 1970

MILITARY SPECIFICATION

TRANSPARENCY, ANIMATED: U.S. RIFLE CAL. 30 M1

This specification has been approved by the Naval Training Device Center, Department of the Navy

The technical requirements for procuring the animated transparency described herein shall consist of this document and the issue in effect of Specification MIL-T-82300.

1. SCOPE

1.1 This specification covers the requirements for an animated transparency of the U.S. Rifle Cal. 30 M1 to visually demonstrate its mechanical and operational functions to groups of students.

1.1.1 This item has been designated by the Naval Training Device Center as Device 29HB6 for Navy procurement. (see 6.2).

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bid or request for proposal form a part of this specification to the extent specified herein:

NAVTRADEV P-1651	Guide for the Animated Transparency, U.S. Rifle, Caliber .30, M1, Device 29HB6

(Copies of specifications, standards, drawings and publications required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the Contracting Officer).

3. REQUIREMENTS

3.1 Materials.- Materials shall be in accordance with 3.1.1 through 3.1.3. Materials not specified in 3.1.1 through 3.1.3 shall be in accordance with the materials requirements of MIL-T-82300.

3.1.1 Cements.- Cements used for joining plastic components shall be those cements recommended by the manufacturer of the plastic and tested by the contractor as suitable for meeting the cementing and performance requirements of this specification.

3.1.2 Metals.- Except for springs, all metal parts and fastenings used in the device, shall be of stainless steel or satin-finish chromium plated in accordance with QQ-C-320 or clear-anodized aluminum in accordance with MIL-A-8625, as applicable.

3.1.3 Wood and wood products.- The top and bottom of the carrying case shall be 1/4 inch thick, exterior grade plywood, smooth two sides.

3.2 Design.- The animated transparency shall be designed to meet the design requirements of MIL-T-82300 and be capable of demonstrating the operational functions of NAVTRADEV P-1651.

3.3 Construction.- Except as specified by 3.3.1 of this specification, the animated transparency shall be constructed in accordance with the construction requirements of MIL-T-82300.

3.3.1 Bonding of plastic parts by capillary attraction shall require specific written approval of the procuring activity for each specific variance.

3.4 Performance.- The animated transparency, when used on the overhead projector, shall withstand the temperatures produced by a 1,000-watt projection lamp for a period of 45 minutes with the projector's heat filter removed, in a room with ambient temperatures ranging to 90 degrees Fahrenheit. At the end of this period, the animated transparency shall meet the conditions listed in 3.4 of MIL-T-82300.

3.5 Details of components.-

3.5.1 Baseplate.- Except as specified in 3.5.1.1 of this specification, the baseplate shall be in accordance with the baseplate requirements of MIL-T-82300.

3.5.1.1 Dust seal.- The parting lines of the layers of the baseplate shall be sealed with white opaque or aluminum polyester tape so as to be dustproof and to mask edge lighting effects. Dust seals shall be provided wherever a laminated component is used. Such seals, in projectable areas, shall be applied to the edges only.

3.5.2 Movable components.- Movable components shall be in accordance with the movable components requirements of MIL-T-8230C.

3.5.3 Focusing mark.- A projectable mark shall be provided in accordance with the laboratory model and Figure 1 and 3.5.3 of MIL-T-82300.

3.5.4 Stops.- Stops for flaps and slides shall be provided in accordance with the laboratory model and 3.5.4 of MIL-T-82300.

3.5.5 No electrical components are required.

3.5.6 Controls.- Controls for actuating the various movable components shall be in accordance with the laboratory model. The controls shall be numbered as on the laboratory model, to be compatible with the operational functions of NAVTRADEV P-1651. All controls shall be movable by light finger pressure.

3.5.7 Carrying case.- The carrying case shall be in accordance with 3.5.7 and 3.5.7.1 of MIL-T-82300. The material for the top and bottom of the case shall be as specified in 3.1.3 of this specification.

3.6 Dimensions and tolerances.- Dimensions and tolerances shall be in accordance with the laboratory model, except as may be otherwise required to conform to the requirements of 3.4, and 3.5.6 of this specificatior and 3.4 and 3.6 of MIL-T-82300.

3.7 Finish and color.-

3.7.1 Finish.- Finish shall be in accordance with 3.1.2 of this specification and 3.7.1.1 through 3.7.1.3 of MIL-T-82300.

3.7.2 Color.- Colors for the animated transparency components shall be the same as in the laboratory model.

3.7.2.1 Colors listed in Table I of MIL-T-82300, or their equivalents in hue, clarity, transparency and durability as its corresponding commercial acrylic color, shall be used.

Check the source to verify that this is the current version before use.

3.7.2.2 The carrying case shall be finished with satin-finish lacquer, gray color No. 26152 of FED-STD-595.

3.7.3 Cleaning.- Cleaning shall be in accordance with 3.7.3 of MIL-T-82300.

3.7.4 Waxing.- Waxing shall be in accordance with 3.7.4 of MIL-T-82300.

3.8 Nameplates and emblems or product markings.-

3.8.1 Nameplate and emblem.- A Government-furnished nameplate and emblem shall be affixed to the animated transparency in the same locations as on the laboratory model.

3.8.2 Product markings.- All nomenclature notes, and control numbers on the animated transparency shall be the same as on the laboratory model.

3.8.3 The carrying case shall be marked in accordance with figure 2 of MIL-T-82300.

3.9 Workmanship.- Workmanship shall be in accordance with 3.11.1 through 3.11.4 of MIL-T-82300.

4. QUALITY ASSURANCE PROVISIONS

4.1 Except as specified in 4.1.1 of this specification, quality assurance provisions shall be in accordance with the quality assurance provisions of MIL-T-82300.

4.1.1 Responsibility for inspection.- Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

5. PREPARATION FOR DELIVERY

5.1 Preparation for delivery shall be in accordance with the preparation for delivery requirements of MIL-T-82300.

6. NOTES

6.1 Except as specified in 6.2, the notes of MIL-T-82300 shall be applicable.

6.2 Ordering data.- Procurement documents should specify the following:

(a) Title, number and date of this specification

(b) Procuring activity designation (see 1.1.1)

(c) Selection of applicable levels of preservation, packaging and packing (see 5.1 and 5.2 of MIL-T-82300)

(d) Government-furnished and Government-loaned property

(e) Availability of the Government-loaned laboratory model of the animated transparency for examination prior to award and loan to the successful bidder or offeror.
